

## Hawke's Bay Health Consumer Council Meeting

**Date:** Thursday, 8 December 2016

**Meeting:** 4.00 pm to 6.00 pm

**Venue:** Te Waiora Meeting Room, District Health Board Corporate Office,  
Cnr Omaha Road & McLeod Street, Hastings

**Council Members:**

Graeme Norton (Chair)	Jenny Peters
Rosemary Marriott	Olive Tanielu
Heather Robertson	Jim Henry
Terry Kingston	Malcolm Dixon
Tessa Robin	Rachel Ritchie
Leona Karauria	Sarah Hansen
Jim Morunga	Sami McIntosh
Nicki Lishman	

**Apologies:**

**In attendance:**

Kate Coley, Director Quality Improvement and Patient Safety  
Ken Foote, Company Secretary  
Tracy Fricker, Council Administrator and EA to DQIPS  
Jeanette Rendle, Consumer Engagement Manager  
Deborah Baird, Health Hawke's Bay (for Nicola Ehau)  
Debs Higgins, Clinical Council Representative

## HB Health Consumer Council Agenda

**PUBLIC**

Item	Section 1 – Routine	Time (pm)
1.	Karakia Timatanga (Opening) / Reflection	4.00
2.	Apologies	
3.	<a href="#">Interests Register</a>	
4.	<a href="#">Minutes of Previous HB Health Consumer Council</a> (October) <a href="#">Minutes of Clinical Council / including Joint Meeting</a> (November)	
5.	<a href="#">Matters Arising - Review Actions</a>	
6.	<a href="#">Consumer Council Workplan</a>	
	<b>Section 2 – Workshop</b>	
7.	<a href="#">Consumer Engagement in Transform &amp; Sustain Projects</a> – Kate Rawstron	4.10
	<b>Section 3 – For Discussion</b>	
8.	<a href="#">Long Term Conditions</a> – Leigh White and Jill Garrett 10.1 Framework 10.2 Appendices	5.10
9.	<a href="#">Collaborative Clinical Pathways update</a> – Leigh White	
	<b>Section 4 – For information only</b>	
10.	<a href="#">Annual Maori Plan Q1 Jul-Sept 16</a>	-
11.	<a href="#">Consumer Council Annual Workplan 2016/17</a> (final)	
	<b>Section 5 – General Business</b>	
12.	Topics of Interest - Member Issues / Updates	5.45
13.	Karakia Whakamutunga (Closing)	
	<b>Followed by Christmas Cheer at Vidals</b>	

**NEXT MEETING: Thursday, 8 February 2017**  
**Venue: HBDHB Boardroom, Corporate Office**

Tauwhiro Rāranga te tira He kauanuanu Ākina

## Interest Register

## Hawke's Bay Health Consumer Council

Dec-16

Name Consumer Council Member	Interest eg Organisation / Close Family Member	Nature of Interest eg Role / Relationship	Core Business Key Activity of Interest	Conflict of Interest Yes / No	If Yes, Nature of Conflict: - Real, potential, perceived - Pecuniary / Personal - Describe relationship of Interest to
Graeme Norton	3R Group Limited	Director/Shareholder	Product Stewardship	No	Group is sponsored by HBDHB  Could be a perceived conflict, however will not take part in any discussions relating to any contract matters if these arise.
	NZ Sustainable Business Council	Deputy Chair	Sustainable Development	No	
	HB Diabetes Leadership Team	Chair	Leadership group working to improve outcomes for people in HB with diabetes	No	
	Advancing life cycle management thinking across NZ	Chair, Advisory Group	Advancing life cycle management thinking across NZ	No	
	U Turn Trust	Trustee	Relationship and and may be contractual from time to time	Yes	
	Integrated Pharmacist Services in the Community (National Committee)	Steering Group Member	Health and wellbeing	No	
Rosemary Marriott	YMCA of Hawke's Bay	President	Youth Including health issues	No	
	Totara Health	Consumer Advisor	Health and wellbeing	No	
Heather Robertson	Restraints Committee of DHB	Committee Member	Representing Consumers on this Committee	No	
Terry Kingston	Central Hawke's Bay District Council	Elected Member	Local body	No	Will declare any perceived interests as they arise.
	Interest in all health matters, in particular - Mental Health, Youth, Rural and Transport. Age Concern Hawke's Bay	Board Member			
Tessa Robin	Te Kupenga Hauora - Ahuriri	Finance and Quality Manager	Responsible for overseeing QMS for organisation and financial accountability	No	Potential - Employer holds contracts with HBDHB
Leonna Karauria	NZ Maori Internet Society	Chairperson	Advocacy on Maori Communities	No	If contracted for service, there could be a perceived conflict of interest.  Approached in early 2014 by HBDHB and contracted for service to provide wireless internet service to Wairoa Rural Health Learning Centre and Hallwright House. Could be a perceived conflict of interest.
	Simplistic Advanced Solutions Ltd	Shareholder / Director	Information Communications Technology services.	Yes	
	Wairoa Wireless Communications Ltd	Director/Owner	Wireless Internet Service Provider	Yes	

HB Health Consumer Council 8 December 2016 - Interests Register

Name Consumer Council Member	Interest eg Organisation / Close Family Member	Nature of Interest eg Role / Relationship	Core Business Key Activity of Interest	Conflict of Interest Yes / No	If Yes, Nature of Conflict: - Real, potential, perceived - Pecuniary / Personal - Describe relationship of Interest to
Nicki Lishman	Employee of Ministry of Social Development	Regional Health Advisor	Liaising with health community and supporting Work and Income Staff.	Yes	Could be perceived/potential eg., situation where gaps identified regarding funding.
	Registered Social Worker, member of ANZASW	Professional body	Social work	No	
Jenny Peters	Nil				
Olive Tanielu	HB District Health Board	Employee	Work with Pacific Island children and families in hospital and in the community	Yes	Perceived/potential conflict between employee HBDHB and roles of Consumer
Jim Morunga	Nil				
Malcolm Dixon	Hastings District Councillor	Elected Councillor	Non paid role	No	
	Sport Hawke's Bay	Board of Trustees		No	
	Scott Foundation	Allocation Committee		No	
	HB Medical Research Foundation Inc	Hastings District Council Rep		No	
James Henry	Health Hawke's Bay Ltd	Facilitator	Part-time role. Improving lifestyles for people with chronic illness.	No	
Rachel Ritchie	Put the Patient First	Involved when group was active	Advocating for Diabetes Patients	Unsure	Real / potential / Perceived
Sarah de la Haye	Nil				
Sami McIntosh	Eastern Institute of Technology	Student Nurse	Practical placements	No	Perceived potential if applying for work.

**MINUTES OF THE HAWKE'S BAY HEALTH CONSUMER COUNCIL MEETING  
HELD IN THE TE WAIORA MEETING ROOM, HBDHB CORPORATE OFFICE  
ON 13 OCTOBER 2016 AT 4.00 PM**

**PUBLIC**

- Present:** Graeme Norton (Chair)  
Rosemary Marriott  
Malcolm Dixon  
Jenny Peters  
Nicki Lishman  
James Henry  
Terry Kingston  
Leona Karauria (4.25 pm)  
Olive Tanielu  
Sarah Hansen  
Sami McIntosh
- In Attendance:** Kate Coley, Director - Quality Improvement & Patient Safety (QIPS)  
Jeanette Rendle, Consumer Engagement Manager  
Deborah Baird, Health Hawke's Bay  
Tracy Fricker, EA to Director QIPS and Council Administrator
- Apologies:** Jim Morunga, Tessa Robin and Rachel Ritchie

**SECTION 1: ROUTINE**

**1. KARAKIA TIMATANGA (OPENING) / REFLECTION**

The Chair welcomed everyone to the meeting. Rosemary Marriott provided the karakia in Maori and English.

A new attendee to the meeting is Deborah Baird, Acting Manager, Quality & Innovation at Health Hawke's Bay. Deborah will be the representative from the PHO while Nicola Ehau is the Acting CEO.

**2. APOLOGIES**

The apologies as above were noted.

**3. INTERESTS REGISTER**

No conflicts of interest for items on today's agenda.

The Chair advised he has a new interest as a trustee for the U Turn Trust in Flaxmere. A new interest is to be noted for Terry Kingston, he is now on the Board for Aged Concern Hawke's Bay.

**Action:** *Update the interests register for Terry Kingston.*

**4. PREVIOUS MINUTES**

The minutes of the Hawke's Bay Health Consumer Council meeting held on 15 September 2016 were confirmed as a correct record of the meeting.

Moved and carried.

## 5. MATTERS ARISING AND ACTIONS

**Item 1: *Refine Consumer Portfolios 2016/17***

Included on agenda under item #10

**Item 2: *Te Ara Whakawaiaora / Mental Health***

Due to a number of things happening in Mental Health this topic will now be discussed at the first quarterly meeting in 2017.

The joint meeting with the Clinical Council will be held on Wednesday, 9 November. There will be a combined agenda with a workshop on Palliative Care. The Chair advised he would not be at the meeting as he will be at a meeting in Waikato DHB. He will delegate responsibility for a Co-Chair.

**Item 3: *Interests Register***

Interest for new member Sami McIntosh received and added to the register. *Item can be closed.*

**Item 4: *Consumer Council Annual Plan for 2016/17***

Included on agenda under item # 10

## 6. WORK PLAN

The Chair commented that the agenda for the joint meeting in November looks large. He will be reviewing with the Co-Chairs of the Clinical Council as a number of those items on the work plan will be for information and a few items for discussion.

## 7. CHAIR'S UPDATE

The Chair advised that he and Jeanette Rendle attended a meeting in Auckland on 29 September for a collective of Consumer Councils. There are only four DHBs who have consumer councils in place (Canterbury, Northland, Counties and Hawke's Bay) and seven on the way to having a consumer council. Since that meeting two other DHBs have joined. It was a full day of working through issues of governance, co-design and getting a structure together on how information can be shared. It will be an enduring group that will continue to support each other as consumer councils develop overtime.

It was noted that although some of the DHBs don't have a Consumer Council in place, they do have good consumer engagement operationally, just not at a governance level. We are lucky in Hawke's Bay that the CEO and Board support the Consumer Council.

## 8. CONSUMER ENGAGEMENT MANAGER'S UPDATE

Jeanette Rendle advised that this last month a lot of planning has been going into the preparation for Patient Safety Week which is a Health Quality & Safety Commission (HQSC) initiative. This year the week is from 31 October to 5 November, the theme being the same as last year "Let's Talk". The HQSC have resources and activities planned to support the promotion of the week. We have Let's Talk badges, tee-shirts and patient safety cards on how to keep safe in hospital as well as some promotions to get staff involved. Jeanette has also been spending time assisting services at operational level with interviews and capturing the consumer voice to inform process and service improvements particularly in the Day Surgery Unit and with the Engage Team.

## SECTION 2: FOR DISCUSSION

### 9. PALLIATIVE CARE IN HAWKE'S BAY 2016-2026

The Chair welcomed Mary Wills (Head of Strategic Services) to the meeting to talk about our vision and priorities in the future for palliative care in Hawke's Bay. The Specialist Palliative Care Team from Cranford also attended. Dr Martyn Horsfall, Medical Director, Janice Byford-Jones, CEO and Karen Franklin, Clinical Services Manager.

Chris McKenna, Chief Nursing Officer is the sponsor for this project. The original paper came to the Clinical Council and Consumer Council about 18 months ago, there has been a lot of work done since then. They are interested in getting feedback from the Consumer Council on the revised paper and want to ensure that they have captured previous feedback. The process from here is that the Consumer Council are the first group to see this revised document. It will then go back to Strategic Services and be signed off by the CEO in draft, before wider sector consultation.

#### **Questions / Feedback:**

- Well written, clear and you can hear the consumer voice throughout the document
- The original document was from a clinical perspective this one is from the patient / whanau perspective
- The document acknowledges the purpose
- On page 39 – new SPC built by December 2019? There is no ability to extend the Knight Street site. A new purpose built facility will be needed in the next 3-5 years. This is at the idea stage only, no plans are in place. This will need wide community consultation on what is required, location and accessibility
- Looking at the cultural responsiveness, will a pacific Kaitakawaenga be employed? Some of these families don't get the message or understand what is involved, there are a lot of families without enough support. One of the things we need is a culturally appropriate workforce and there will be an action plan which includes cultural responsiveness
- Health Literacy is important so people can make informed decisions about their health, not just the patient, but also for the family
- Maori tend to care for their own at home or the Marae. It is not in their culture to go to palliative care or people who are not whanau related. It is a tapu topic, people don't like to talk about death
- At a Hui they looked at alternative therapies, would like to see engagement where whanau are encouraged to be trained to provide the care so they can take self-ownership and work alongside clinicians and specialists
- The Specialist Care Service at Cranford see themselves as walking alongside people to support what is best for the patient and whanau with the primary palliative carers e.g. family members, GPs, practice nurses. We want to have the difficult conversations and engage with our community in what way is appropriate
- Advanced care planning and wanting to see that being owned in the community. We need a workstream for this
- A lot of people just don't like to talk about death and dying. We need to start talking about death and making it a normal thing to think and talk about, having these conversations at the right time and not leaving it until the end
- Sometimes it is good to take a different approach, talking to communities rather than individuals about advanced care planning is better, having a workshop e.g. church groups in the pacific community, rather than speaking to individuals when they are sick they can get offended. Sometimes it is better for someone in the community group to discuss the subject rather than someone from the outside coming in
- The tone of the document was generally very good, in some places it is "what we are doing to do to you". On page 23 under "Access 24 hours, 7 days a week" concern when primary care is mentioned that the cost for this will be on families who are already struggling and cannot afford it

- There is a primary palliative care scheme, if you meet the criteria there is the ability to have free visits, extra consultations. What we want to do as a specialist service is support that business case to get sustainable funding
- It's not just about sustainable funding, it's helping families manage without making them pay
- One of the things that Cranford is doing already is a co-ordinated programme, the Minister of Health has prioritised funding for palliative care. The latest funding has been put into a co-ordinator for bereavement to support the carers so they don't get burnt out. There will be more funding nationally for palliative care
- Talking, communication and support is what is important.
- Specialist Palliative Care have worked hard to get the message out, there is no cost to the patient or the family for the services they provide and they try to make sure through their social worker that they can connect if it is appropriate with the cancer network or WINZ to make sure that people don't fall over

Additional feedback can be provided to [mary.wills@hbdhb.govt.nz](mailto:mary.wills@hbdhb.govt.nz).

The Chair thanked the Specialist Palliative Care Team for coming and commented that there are opportunities for improvement and strong endorsement of the paper by the Consumer Council.

## **10. WORKING TOGETHER FOR TAMARIKI IN HAWKE'S BAY**

The Chair welcomed Dr Russell Wills (Community Paediatrician and Medical Director, QIPS) to the meeting. Dr Wills advised that the bulk of his practice is with children with very challenging behaviours and many of the children come from families where there is a high degree of violence, mental health and addiction issues. As Children's Commissioner a big part of his job was monitoring the work of Child Youth and Family, giving him a national perspective on children who are in families with parents that are struggling. Towards the end of his tenure as Children's Commissioner he became involved in a piece of work looking at a core competency framework for the workforce who work with children with these types of issues in health, education and social services. Through the professional bodies there is a draft framework that describes the competencies that practitioners need to be able to work with families where there is violence, mental health and addictions. MSD are looking for a place to trial the competency framework. Through MSD, a charitable, the Lloyd Morrison Foundation and the DHB we have \$250,000 to trial the competency framework on practitioners who work with children, young people and their families in Hawke's Bay. The group is called "The Vulnerable Children".

There are approximately 250 practitioners working across health, education and social services. The competency framework is a tool for managers to sit down with their staff to talk about their skills and knowledge across a number of areas of practice e.g. assessment of domestic violence, mental illness, addictions, normal development and behaviour of children affected etc. Once this information is aggregated it will give us a picture of the kind of development, programmes and training needed to be put in place for practitioners to grow their skills to meet the needs of those children and their family/whanau.

The competency framework has had input from the professional bodies for psychology, medicine, nursing and teaching. It hasn't had strong input from consumers yet or children and young people. We also need Maori and Pacific input for the project.

Dr Wills would like to have a discussion and get the Consumer Council's thoughts about how this sounds, what might be needed and how it might work?

### **Questions / Feedback:**

- Are people doing the wrong work? The best people to help may not be professional people but people from the community supported.

- What we have the funding to do is to develop the workforce. How we do it e.g. being clear what do we mean by empowering? Empowering the whanau is to use the tools to support the whanau to identify what their goals are and what they need to meet their goals
- Relationship centred practice and the family partnerships model is all about teaching practitioners to do that. These are often the most disempowered families and whanau. Adults carrying trauma from their own childhoods. You need to gain rapport and trust to help them identify what their goals are. We need to be clear as health professionals our paramount concern is the well-being of children
- This funding is for the first year of the project, in a three year project, we don't know what the development needs of staff will be and we want to redirect the current budgets for workforce development for years two and three.
- Can a smaller pilot be done in Camberley and Maraenui to see what happens there as they are very vulnerable communities and have diverse ethics groups, to find out what is needed and what the results are before rolling it out further?
- Focusing on the worse functioning demoralised families is the hardest rock to move. People can be in such a dreadful state that you cannot work on anything with them as there are other things that are much worse going on in their lives, debt collectors at the door, no food, electricity being cut off etc. It is hard to get the trust of these families
- Agree about getting the basic needs for people. In terms of practitioner development it's about human engagement and showing that you care, taking the time and listening to their stories, finding out what would feed and nurture the person's soul. It has to be a partnership
- A core competency should be empathy
- This is why we need to pilot. Within the first year we will find out whether the 12 competencies make sense and things you want to be able to do. Where is empathy in this, how do you measure / teach that
- Need more advocacy around youth engagement. Is the system working, the system is fine it is the delivery and quality of the delivery.
- What is the accountability whether it's governance or management? Does not see accountability in terms of delivery of service.
- As part of this project there will be accountabilities not only for the practitioners, but for their leaders. There will be an independent evaluation from the beginning. Training leads to practice which leads to outcomes for children. We are not providing whanau training around the caregivers, this is practitioner training it is what we have a contract to do.
- There is other work that does need to happen around empowering whanau, alongside the regional economic strategy there is a social inclusion strategy which is just starting to get going.
- The practitioner training does need to include the accountabilities but we also need to be clear on what information can be shared and with whom and why. When children are at risk you can share information about their parent's behaviours and issues that are putting that child at risk, with the people who need to know, who have the skills to intervene and be helpful. It needs to be done well and safety and how you do that also needs to be part of the training. This needs to be clear amongst the workforce.

The Chair advised from the Maori Relationship Board conversation yesterday there is going to be a Hui. Patrick Le Geyt will be putting this together. Feedback is needed from Maori and whanau, without this it will fail. Information regarding the Hui will be sent out to Consumer Council members if they wish to attend.

Dr Wills thanked the Consumer Council for their support and he looks forward to further discussion at the Hui.

## 11. QUALITY DASHBOARD

The Chair advised that the Quality Dashboard was discussed at the Clinical Council yesterday and this is the chance for the Consumer Council to feedback on the Consumer Experience component.

Kate Coley, Director – QIPS advised we want to establish a joint Patient Experience Committee which feeds into the Clinical and Consumer Councils. We want to make sure we utilising the feedback gathered to inform improvements.

We have the national patient experience survey, it is something that we have to do. We want to make the survey more visible in the organisation and to do more analysis of the comments, looking at the themes, what is happening both positive and negative and use this information to make improvements based on the consumer voice.

The dashboard will get reported quarterly to the Consumer Council via the Patient Experience Committee. At the moment the data is just the DHB. The HQSC are currently looking at running a similar survey for primary care. We are also looking at the themes coming through from complaints and compliments.

What does good look like, are there comparisons with other DHBs? In the commentary we need to provide whether we were above or below the national average. At the moment there is not a lot of statistical differential between the scoring across the DHBs. That is why we don't just want to rely on a figure, the richness comes from the feedback provided.

The feedback we get all the time is that the survey questions are wrong. We are not getting the feedback we want to illicit change across the sector. We need to go through the feedback and see what are the real gems or issues for HBDHB. One of the things DHBs score poorly on is medication on discharge. The HQSC are going to be doing an initiative around how to improve discharge planning and health literacy around medication.

Suggestion that we include the mental health Marama real time survey and also HDC complaints as markers. The national inpatient experience survey does not include mental health.

This draft dashboard is a starting point and it will change overtime.

### **SECTION 3: FOR DECISION**

#### **12. CONSUMER COUNCIL ANNUAL PLAN 2016/17 (DRAFT)**

The Chair advised that the draft annual plan for 2016/17 was included in the papers. Based on the workshop last month, the front page has the objectives for the next 12 months. The portfolios are listed on page 2.

Concern raised that electives is not on plan. The Chair advised that there is a whole range of activity going on around electives at the moment to improve patient outcomes. We can bring electives into the 2017/18 plan once some of the other objectives identified have been completed.

Areas of interest confirmed with the following additions to be noted:

- Sensory and Physical Disability – Sarah Hansen
- Maori Health – Sami McIntosh
- Pacific Health – Sami McIntosh
- Primary Health – Rosemary Marriott

Portfolios for 2016/17 confirmed with the following additions:

- Health & Social Care Networks – Terry Kingston
- Person and Whanau Centred Care – Leona Karauria
- Patient Experience Committee – Terry Kingston

Under support add email and telephone number for Jeanette Rendle, Consumer Engagement Manager. Jeanette can make the connections with the services and workforce to advise them on the consumer council members they can contact to be involved with projects, pieces of work based on the portfolios.

Under Mental Health also add Addictions.

The Director QIPS advised that the intention is that Consumer Council members don't have to be involved with every workstream, but provide an oversight at a higher governance level. If there are workstreams that need a certain group or people you can advise on this and Jeanette will be responsible for connecting consumer council members and consumers into pieces of work, not necessarily relying on just consumer council members. Consumer Council members have a very different governance role to undertake rather than that being an operational one.

The plan with amendments discussed above is approved.

## SECTION 4: GENERAL BUSINESS

### 13. TOPICS OF INTEREST – MEMBER ISSUES / UPDATES

- **Rosemary Marriott** – will be attending the Nuka workshop on 23-24 November. Nuka is a team coming from Alaska to teach us about customer-focused healthcare. Tessa Robin, Rachel Ritchie and Jeanette Rendle will also be attending.
- **Leona Karauria** – queried whether Consumer Council members get ID badges to identify who we they are, would be easier when attending meetings etc.
- **Olive Tanielu** – apologies for November meeting.

**Action:** *Kate to discuss ID cards for Consumer Council members with Ken Foote, Company Secretary.*

### 14. KARAKIA WHAKAMUTUNGA (CLOSING)

The meeting closed at 6.00 pm.

Confirmed: \_\_\_\_\_  
Chair

Date: \_\_\_\_\_

**MINUTES OF MEETING FOR THE HAWKE'S BAY CLINICAL COUNCIL and  
JOINT MEETING WITH HAWKE'S BAY HEALTH CONSUMER COUNCIL  
HELD IN THE EDUCATION CENTRE, HAWKE'S BAY DISTRICT HEALTH BOARD  
ON WEDNESDAY, 9 NOVEMBER 2016 AT 1.00 PM**

**PUBLIC**

**Present:** Dr Mark Peterson (Chair)  
Chris McKenna (Co-Chair)  
Dr Kiri Bird  
Dr John Gommans  
Dr Russell Wills  
Dr Robin Whyman  
Dr David Rodgers  
Dr Caroline McElnay  
Andy Phillips  
Debs Higgins  
William Allan  
David Warrington (3.20 pm)  
Jules Arthur

**In Attendance:** Dr Kevin Snee, Chief Executive Officer (2.25 pm)  
Ken Foote, Company Secretary  
Kerri Nuku, Māori Relationship Board Member  
Tracy Fricker, Council Administrator and EA to DQIPS

**Apologies:** Dr Tae Richardson and Anne McLeod

**SECTION 1: ROUTINE**

**1. WELCOME AND APOLOGIES**

Dr Mark Peterson (Chair) welcomed everyone to the meeting. He advised that the Consumer Council members will join the meeting at 2 pm and that a workshop on Palliative Care and Advanced Care Planning will be held from 4 pm.

Apologies were noted as above. David Warrington will be late and David Rogers, Caroline McElnay and Kerri Nuku have advised they will need to leave before the workshop.

**2. INTERESTS REGISTER**

No conflicts of interests for agenda items.

**3. CONFIRMATION OF PREVIOUS MINUTES**

The minutes of the meeting held on 12 October 2016, were confirmed as a correct record of the meeting.

Moved and carried.

#### 4. MATTERS ARISING, ACTIONS AND PROGRESS

**Item 1: Workshop for Joint Meeting with Consumer Council**

Planning for workshop completed. On agenda for today's meeting items #26 and #27. *Item can be closed.*

**Item 2: Reporting Committees / Monitoring**

The new report template is yet to be developed. This will be part of the work with the clinical committees review. *Item can be closed.*

**Item 3: Laboratory Committee**

Information on EasyCheck kits has been resent to GPs by the PHO. *Item can be closed.*

**Item 4: RMO Strike Update**

Dr John Gommans, Chief Medical & Dental Officer - Hospital (CMDO) advised that the RMO Strike in October was managed well, but around 200 outpatient appointments and 43 operations were postponed. Feedback was that there was no real reduction in attendances in ED or referrals in from primary care. Not sure what could be done different, communication was sent out to primary care. A further strike notice has been issued for 23-25 November. It is hoped that we will not have to postpone as many procedures and day cases as last time. A further complication is that key clinical staff have been approved leave for professional development/conferences during this time and this notice also clashes with the new house officers' orientation. Contingency planning for this latest notice is underway.

**Correspondence In**

Chris McKenna (Co-Chair) advised that with regret she accepted Robyn O'Dwyer's resignation after five years of good work for the Clinical Council. Recruitment for another primary care nurse representative is underway.

**Action:** *Letter of thanks to be sent to Robyn O'Dwyer.*

#### 5. CLINICAL COUNCIL WORK PLAN

The work plan was included in the meeting papers for information. Reminder that the Health Awards is on 24 November, it was noted that this is during the RMO Strike.

The Chair commented that if members have additional items they wish to be added to the work plan that he and Chris McKenna were happy to receive suggestions.

### SECTION 2: FOR DISCUSSION / UPDATE

#### 6. LEARNINGS FROM ICU REVIEW 2013 – PROGRESS UPDATE

Report accepted as read. The CMDO advised that processes for reviews have changed so there is now a much better oversight of report recommendations and action plans. Regular updates will come to Clinical Council until all recommendations have been completed.

#### 7. CLINICAL GOVERNANCE STRUCTURE UPDATE

Dr Andy Phillips, Chief Allied Health Professions Officer (CAHPO) advised that the work around the clinical governance structure has been going on for around 18 months and is has been a team effort. The framework allows the Clinical Council to provide assurance to the Board about

governance of the organisation. An updated draft structure with principles and timelines was tabled. A meeting has taken place with the chairs of the advisory groups which will report to the five committees, to do some co-design and discussion around terms of reference. The draft structure does not include all of the advisory groups, there are some that sit under those on the draft structure which need to be populated.

The Co-Chair advised that it is also part of the work of Clinical Council to have representation on the committees and advisory groups. It was noted that some Clinical Council members are already involved with several of the groups, and this is an opportunity for members to express an interest in particular advisory groups.

The CAHPO asked for feedback on the draft document:

**Feedback:**

- The Patient Experience Committee should report directly to the Clinical Council, but still have involvement with Consumer Council
- There will be a considerable administrative burden, it is important to think about processes, the reports of the advisory groups to the committees and the committees to the Clinical Council, how this is going to be done, how frequently, who is going to organise the meetings, secretarial support etc. This needs to be put in place otherwise it will fall over because it has not been administered properly
- It is timely that the terms of reference are being refreshed, so that everyone knows what is expected of them if they are on one of these committees/advisory groups
- Need to develop a standard reporting template for the advisory groups and committees to use. The Clinical Council does not need to see everything, we need to be informed about any risks to the organisation and achievements
- Clarify the role of the Maori Relationship Board (MRB) on the structure. Possibly some of the committees could provide a report to MRB as well. The Company Secretary noted that extracts of reports from the committees will form part of the Clinical Council minutes which are available to MRB. You do not want to overburden MRB with management clinical information, it is a governance group
- The CMO and MDQIPS have discussed system design/processes and the MDQIPS is happy to take the lead on this work and will meet with the DQIPS on how this will work, workflow management, templates for reporting, terms of reference, agendas and minutes and well as role descriptions and expectations etc
- There is an opportunity to relook at the work plan, when you look at the work plan and see what is reporting through, there may be things that can fall away.

The Chair commented there is still work to be done including confirmation of Clinical Council member representation on the five committees and some of the advisory groups.

## **8. ALLIED HEALTH PROFESSIONS FORUM**

The CAHPO advised that the paper highlights the main issues allied health have been working on including staffing capacity of Allied Health Services, training and support of current staff, developing new staff and new service models. Person and Whanau Centred care is a principle of how allied health work.

The Co-Chair noted that one of the challenges for allied health is the ability to free up study time and funding for that. The CAHPO commented that they are working on developing a training hub as part of the workforce development strategy. Part of this is looking at funding and the ability to back fill for the allied health professions.

## 9. LABORATORY SPECIMENS LABELLING IMPROVEMENT INITIATIVE

The Co-Chair advised that at the October Board meeting there was a query from a Board Member on where we were up to with this initiative? Around 18 months ago the Finance Audit & Risk Committee (FRAC) wanted to know how we were addressing the number of laboratory errors. This paper is an evaluation on where we have got to and the results to date. A small group meet every two months to look at new learnings and support for staff. A consequences process has been implemented for repeated errors and a new laboratory form developed, which has different steps around identifying patients, getting the correct test, the correct patient and accountability for sign-off.

This was a topical piece of work around harm and unwarranted waste. Harm was repeated tests on an individual because of wrong labelling and unwarranted waste is repeat sampling going to the laboratory, being sent back, trying to get IDs and duplication. There is still error to be concerned about, the main one being wrong test/wrong patient, which put patients at risk.

We can be pleased with the work of the group and the results achieved to date, they are going in the right direction. We have seen some sustainable change.

The CMDO commented this is an example of good progress in a hard to achieve area. Getting the message imbedded with staff that shortcuts have serious consequences. There are synergies with Pharmacy looking at medication errors, wrong patient/wrong drug is still a major risk and Radiology when patients are sent for incorrect radiology investigations. This is part of a whole package we are trying to work on. This is the first time we have seen significant change in the trends.

## SECTION 3: REPORTING COMMITTEES / MONITORING

### 10. HB CLINICAL RESEARCH COMMITTEE

The CMDO advised that the last meeting was postponed due to the RMO Strike. A research forum was held on 2 August focused on research in primary care with Di Vicary and Helen Francis speaking to the groups. There are no new issues or risks to report. At the next meeting they will be looking at their terms of reference and membership.

### 11. LABORATORY SERVICE COMMITTEE

Dr Kiri Bird provided a quarterly update on the last quarter from the Committee. There have been a few resignations (midwife, acting laboratory manager and administrator) for the committee. The terms of reference for the committee state that the Clinical Council appoints the midwife. There was an Accreditation visit about 3 weeks ago, she asked for a summary. There were no issues anticipated, but she has not received an update.

The CAHPO apologised for this oversight and advised that at the last audit we received 19 corrective actions and 81 recommendations. We have successfully dealt with all of the recommendations and corrective actions and there were no new corrective actions from the latest visit. Work still in progress is the building of the new histology laboratory which has now received approval from the Board and the provision of clinical pathology expertise to the Laboratory. Ross Boswell has been appointed as the Clinical Director to provide strategic leadership in the Laboratory, but we still need clinical input in microbiology. There are plans for a further review for microbiology.

The terms of reference (TOR) and membership need to be revised. The Company Secretary advised that any changes to the TOR or membership need to come back to Clinical Council for approval.

## **SECTION 4: RECOMMENDATION TO EXCLUDE THE PUBLIC**

### **12. RECOMMENDATION TO EXCLUDE THE PUBLIC**

The Chair moved that the public be excluded from the following parts of the meeting:

13. Minutes of Previous Meeting (Public Excluded)
14. Matters Arising – Review of Actions (Public Excluded)
15. Letter received from CAG on Governance Matters

## **SECTION 5: JOINT MEETING DISCUSSIONS / DECISIONS**

The Consumer Council members joined the meeting at 2.10 pm. The Chair welcomed them to the meeting and round table introductions were made.

Consumer Council members in attendance were: Heather Robertson, Nicki Lishman, Terry Kingston, Rosemary Marriott, Jim Morunga, Tessa Robin, James Henry, Sarah Hansen, Sami McIntosh and Tessa Robin (2.25 pm). Apologies were received from Graeme Norton, Leona Karauria, Jenny Peters, Malcolm Dixon and Olive Tanielu. Jeanette Rendle attended in her support capacity as Consumer Engagement Manager.

### **16. 13-17 YEAR OLD PRIMARY CARE ZERO RATED SUBSIDY**

The Chair welcomed Patrick Le Geyte, Programme Manager, Maori Health to the meeting.

Patrick advised that this proposition came out of the Health Sector Leadership Forum. The District Health Board (DHB) worked up a number of options and presented to the Clinical Council in November/December 2014. The Clinical Council advised that a universal approach to all of the population was not affordable and to focus on Wairoa and other deprivation 8, 9 and 10 areas. Universal approaches to health care are easier to implement than targeted with the difficulties around the funding mechanisms and allocation in primary health care which are funded through practices based in localities.

The proposition is about a zero fees approach with an equity focus on Maori and Pacific populations. During the consultation period with GP practices, the PHO and groups of young people in deprived areas the feedback was similar. GPs acknowledged that cost was a factor but that the model of care was not always responsive to young people, and youth advised the same. The proposition removes cost as a barrier but is also asking primary care practices to change their model of care to be more "youth friendly".

Primary Care advised they preferred Option 1. The cost to implement the proposition is just over \$60,000 more than what the Clinical Council allocated, however not all practices would participate, therefore it was likely to come in under budget.

Following discussion the Clinical and Consumer Council members endorsed the content of the report and supported recommendation Option 1.

### **17. SYSTEM LEVEL MEASURES (DRAFT)**

The Chair welcomed Carina Burgess, Acting Head of Planning and Wayne Woolrich, Business Services Manager, Health Hawke's Bay to the meeting.

Carina Burgess gave an overview of what system level measures were and advised that there are four that the DHB and Health Hawke's Bay working together need to achieve:

1. Ambulatory Sensitive Hospitalisation (ASH) rates per 100,000 for 0–4 year olds (i.e. Keeping children out of the hospital)
2. Acute hospital bed days per capita (i.e. Using health resources effectively)
3. Patient experience of care (i.e. Person centred care)
4. Amenable Mortality rates (i.e. Prevention and early detection)

Two joint primary and secondary workshops were held to brainstorm ideas and subsequent meetings were held to refine the plan. The plan was submitted to the Ministry of Health for review and some changes were required including the ASH 0-4 target which needed to be confirmed, readmission rates will be included, the amenable mortality rates will include ethnicity data and a change is required to the patient experience of care measure where we had the definition wrong. Some of the language in the report was also changed to be consistent with the rest of the country.

Wayne Woolrich commented that we have a great opportunity to develop a framework for Hawke's Bay which is more valuable and meaningful for our population. We have come from the IPIF (integrated performance and incentive) framework which is five national set targets monitoring general practice and incentive payments based on performance. The Ministry have launched the system level framework with not a lot of time for us to get ready for it and the challenge has been getting the right people around the table on what this means for Hawke's Bay. Year one is around educating primary and secondary on what system level measures are. The Ministry have provided a framework and they want to see primary and secondary working together developing the plan for Hawke's Bay. The PHO are proposing in their payment structure to general practice in year 1 that they monitor attendance and incentivise general practice to get around the table.

#### Questions / Feedback:

- Was changing immunisation rates for dental discussed? It was brought up and is under discussion to include an oral health measure next year
- Access to GP visits within 24 hours, Hawke's Bay appears to have the worst performance in the county. Should we consider a measure about access to a GP appointment within 24 hours? Like this idea, data may be better already and hopefully will improve with the urgent care alliance
- When this initiative first came out we thought it could be used as a tool to drive improvement, but the response from the Ministry has been underwhelming
- There a lot of different funding streams which don't add up to a lot, if you put them together they do
- We want general practice to approve sharing data across primary and secondary
- Building and mapping good networks will give us a better outcome, it is a culture change
- Trying to incentivise people to do the right things
- Too much talk about money and not enough talk on what is good for the patient. For too long GPs have been receiving funding for what is the success rate, for Maori it is not good. We have already been paying them for to not succeed. We should not be talking about incentives for them to continue not to succeed. Agree with getting primary sitting around the table and talking with everybody who is involved in the care of whanau, not just secondary. The interest is about the health and wellbeing of whanau and not money. Secondary has been doing some positive work moving forward putting the patient/whanau first, would like to see the same from GPs
- As an example, feedback from the community is that GPs won't do the smoking target without an incentive. GPs as a rule do not see the current target as being the right target, should the right target be developed GPs will fully support it. The new system level measure of Smokefree households for children at 6 weeks will be strongly supported as it makes sense and can be easily measured
- The smoking target was badly designed. If you get a target that makes a difference it will be easier to get GPs engaged

- With smoking you need to reduce the uptake, that is where the money needs to go. The uptake rates for Maori between the ages of 24-50 was 1% different in the 2006 census (50%) to the 2013 census (51%)

Wayne Woolwich commented that the system level measures framework it is a great opportunity to get primary and secondary around the table to focus on how we improve health outcomes for our population of Hawke's Bay. That is the intent of the framework.

Following discussion the Clinical and Consumer Council members endorsed the content of the report and supported the recommendations.

## **18. ALCOHOL HARM REDUCTION POSITION STATEMENT**

The Chair welcomed Dr Rachel Eyre, Medical Officer of Health to the meeting. Dr Eyre advised that since she last spoke with the Clinical and Consumer Councils in July, a draft position statement had been prepared. They are now seeking endorsement from the councils for the statement to be adopted by the Board.

It was noted that there has been unanimous support for a position statement on reducing alcohol related harm. There was the desire that it be "punchy and positive", the vision was whanau and community oriented and was an opportunity for engagement and further collaboration. Working in partnership with the community, iwi lead strategies, consistent messaging and integrating with other work like fetal alcohol, youth strategy, family violence and the with councils around the alcohol strategy. It was acknowledged that this is a societal issue and there would be no quick fixes. This is an opportunity for the DHB to take the lead and be part of the solution to move forward on this issue.

Following discussion it was felt that the first sentence was a mixed message and suggested a minor change, remove the first part of the sentence and start with "Hawke's Bay District Health Board recognises that..."

The Clinical and Consumer Councils fully endorsed the position statement and the recommendation for the Board to adopt the position statement.

## **19. TRANSFORM AND SUSTAIN PROGRAMME REFRESH**

The Chair welcomed Kate Rawstron, Project Management Office Manager to the meeting. The content of the report was noted.

Kate Rawstron advised that this paper articulates the outputs of the projects from the transform and sustain refresh process. They have been brought together in a series of workstreams. We want to work collectively and in an integrated fashion. Feedback received was that we needed to get leadership and partnership coming through a lot stronger than what we had previously. While the document shows as a workstream structure, which suggests silos, we know that there is a lot more fluidity across workstreams, particularly around person and whanau centred care and investing in staff, these two will be very much integrated.

Endorsement is now being sought from the Clinical and Consumer Councils on the 19 projects proposed in the paper.

### **Questions/Feedback:**

- Query regarding "School Ready" (page 6) does this include before school checks? This project is building on the work already being done and integration across services and whole of public sector delivery

- Pleased that clinical leaders have been involved, without this things will not change. It is also about how we support consumers to change
- There is an IS project on the shared health record in maternity that is not on the plan, it is across section and includes GPs and LMCs
- In the diagram (page 3), need to identify the patient experience survey as “local” so it is not confused with the national patient experience survey
- Under person and whanau centred care we are not demonstrating all the ways we engage with our consumers, we need to look at the other areas and mediums used to communicate with our consumers, joining up the dots
- There is a considerable amount of work going on outside of this framework, the greater use of social media to communicate etc. There are a lot of things happening that may not be a specific project
- Good to see clinical leadership, we are starting to lose those people who could transform and sustain
- There is a lot of organisational fatigue out there and competing priorities, what can we do to get people re-engaged? Suggestion of a quarterly meeting of all project leads
- Sometimes it can be difficult to get away to attend the transform and sustain seminars
- Recognising the time it takes to successfully lead these projects is important. People don't have time and have to shuffle commitments and project work can get de-prioritised. Being mindful of the commitment it takes to be a project lead. Staff may need to be released from other duties
- Suggestion to use Livestream for those who do not work or live in Hastings or webinar so that staff can access at any time. Then you are sharing information at a time they are able to access it.

The Clinical and Consumer Councils noted the content of the report and endorsed the new projects being proposed.

## **20. URGENT CARE ALLIANCE PROJECT END REPORT**

The Chair advised that the paper noted the current status of the project work. The GP after hours Request for Proposal (RFP) work is currently in abeyance at the request of the parties that put in the RFPs and they are working together to come up with a proposal to co-locate a GP after hours service in Hastings close to the Emergency Department.

The remaining two workstreams, the advanced practitioner workforce and aged residential care have options identified in the paper for approval.

The Co-Chair advised that until the model of care is finalised the advanced practitioner workforce is in abeyance. We are moving towards advanced clinical nurse specialists and nurse practitioner development in primary and emergency care. This was part of the original business case around changes to ED. A lot of work has also been done around mobilising allied health services. We are reliant on what the model is and how can we participate going forward.

It is noted that allied health needs to be involved in both these projects, there is a lot of synergy between nursing and allied health.

Aged residential care is work to be progressed. We are not at that point yet. The GP after hours needs to be sorted first. The timeframe for the GP after hours to be in place is April 2017.

## **SECTION 6: FOR INFORMATION – NO DISCUSSION**

### **21. TRAVEL PLAN UPDATE**

The report provided an update on the Go Well Travel Plan since August 2016. No issues discussed.

## **22. ORTHOPAEDIC REVIEW – CLOSURE OF PHASE 1**

The report provided an overview of the work that has been carried out to re-design musculoskeletal and orthopaedic Services and the closure of phase one. No issues discussed.

## **23. REGIONAL TOBACCO STRATEGY FOR HB (2015-2020)**

The report provided an annual update of the regional tobacco strategy for Hawke's Bay with focus on progress towards the three objectives through monitoring of the six key indicators. No issues discussed.

## **24. TE ARA WHAKAWAIORA / SMOKING (NATIONAL INDICATOR)**

The report was provided for information only. No issues discussed.

## **25. ANNUAL MAORI PLAN Q1 JUL-SEP 2016**

The report was a late withdrawal from the agenda and will be provided at a later date.

## **SECTION 6: WORKSHOP – PALLIATIVE CARE AND ADVANCED CARE PLANNING**

Chris McKenna (Co-Chair) facilitated the workshop. A welcome was extended to the additional attendees from Cranford Hospice, Health Hawke's Bay and other DHB staff.

Feedback from those present was captured, however with further consultation planned with stakeholders. A final report will go to the Board in early 2017 for consideration.

The combined meeting closed at 5.30 pm

## WORKSHOP

Consumer Engagement in Transform & Sustain Projects

 <b>HAWKE'S BAY</b> District Health Board Whakawāteatia	<b>Hawke's Bay District Health Board Long Term Conditions Framework</b>
	For the attention of: <b>Maori Relationship Board, Clinical and Consumer Council</b>
Document Owner:	Tim Evans and Mark Peterson
Document Author(s):	Jill Garrett, Strategic Services Manager and Leigh White
Primary Care Sponsor(s)	Mark Peterson Chief Medical Officer Primary Chris McKenna – Chief Nursing Officer Primary and Secondary
Date:	December 2016

**Purpose:**

1. Acknowledge and endorse content of draft Framework
2. Provide feedback regarding;
  - implementation stages and their timing
  - trial with diabetes and respiratory services to inform final document
  - identification of members for a LTC Advisory Group (inclusive of primary care – secondary services – allied health - Māori health providers and consumers)

**1. BACKGROUND**

Long term conditions have become the most significant cause of death and disease. Hawke's Bay is above the national prevalence<sup>1</sup> in 6 out of 11 chronic disease risk factors for adults aged 15 years and over. The financial burden of this equates to 15% of the total health spend.

Currently 81% of funds associated with Long Term Conditions is spent on acute management and rehabilitation services, and only 19% on early intervention and prevention.

The framework is aimed at shifting the focus towards early intervention and prevention within the next 5 years. Within that time frame it is anticipated that shifting the spend ratio to a 60% acute management-rehabilitation and 40% early intervention and prevention could be achieved. This would equate to approximately a 4% change in budget allocation per annum over a 5 year period.

To date Hawke's Bay DHB has not had a strategic document that provides a framework against which the planning and reporting for Long Term Conditions can be aligned and monitored. In 2015 it was identified as a priority by both primary and secondary care services. In April 2016 the Strategic Services Manager – Primary Care and the Portfolio Manager Long Term Conditions commenced the development of the framework in consultation with consumer, primary, secondary and allied health teams.

<sup>1</sup> <sup>1</sup> NZ Burden of disease study 2013. Chronic Disease: Current Situation Analysis (Prevalence, Morbidity and Mortality)-Lisa Jones Business Intelligence HBDHB.

The HBDHB Long Term Conditions Framework is generic in its approach. It is not disease specific. Nationally and internationally effective Long Term Conditions approaches focus holistically on the person and/or whānau, listening to ‘what matters to you’ rather than asking “what’s the matter with you”.

Many of our whānau have more than one long term condition which has an impact on, or can be a result of, mental health and un-wellness. Threaded throughout the framework is recognition that mental wellness/illness impacts greatly on effective self-management of long term conditions.

## 2. FRAMEWORK STRUCTURE

Based on the **Four Aka (roots)**; Person-Family-Whanau Centred Care, Person Centred Systems and Processes, Workforce Development and Enablement and Risk Identification and Mitigation. Each of the Four Aka have four contributing dimensions (see pages ..... of the Framework). Where appropriate the outcome attached to each of the dimensions is linked to both System Level Measures and the outcomes (currently draft) of Transform and Sustain.

The methodology for change on which the framework is based is IHI Improvement Methodology. This is an outcomes based methodology that works through setting up manageable (small) change environments that lead to system wide improvements.

**Implementation tool – to achieve system wide improvement –.** The Long Term Conditions Service Review Matrix (**LTC-SRM**) is a self-review tool, against which services can evaluate their achievement against the Four Aka.

The SRM is structured around a continuum of excellence (see Appendix One of the Framework). With the support of QIPS facilitators et.al, services will;

- be invited to work within a multi-disciplinary approach to addressing Long Term Conditions
- assess where they sit on the LTC-SRM using agreed sources of evidence
- utilise service planning and reporting mechanisms to work towards shifting performance within the continuum towards excellence.
- The **LTC-SRM** serves also as a global assessment tool - for where services across the sector (both primary and secondary) sit in relation to performance against LTC outcomes. (*see page 11 of appendix one*). This will provide a helicopter view of where areas need to be strengthened and
- additional resources and support placed to move performance from entry level to excellence.

## 3. FRAMEWORK PURPOSE

- Address equity through a focus on consumer (whānau) focused services
- Achieve optimised health outcomes for the population of Hawke’s Bay
- Ensure that evaluation does not rest solely with measuring clinical outcomes but includes quality of life, patient activation measures, confidence measures based on researched self-care and self-management methodologies<sup>2</sup>
- Shift from individual service to integrated service models of delivery (MDT and IDT)

---

<sup>2</sup> Self-Care and Self-Management programs of work currently in practice within Hawke’s Bay include the Stanford Model (recognised in over 43 countries), WHO, Brief Quality of Life Tool and at its inception phase Clinical and Patient Activation measures based on Relationship Centred Care.

- Evaluate the spend (total) for long term conditions and how focusing on risk mitigation, prevention and early intervention will have a positive impact on reducing demand on; ED Presentations, ED Admissions and Length of Stay.
- Provide a tool against which services can evaluate their effectiveness<sup>3</sup> against the four Akas of the framework and measure progress towards achieving excellence over time.
- Use an interdisciplinary approach in the design and ongoing evaluation and modification of the services to improve health outcomes
- Challenge the status quo and provide opportunity for innovative practice based on co- design models of care

#### 4. IMPLEMENTATION

##### Stage 1:

###### April – Nov 2016 (completed)

- Consultation with a wide range of consumers (groups and individuals), service providers both secondary and primary, Health Hawke's Bay Population Priority Committee, members of the HBDHB Clinical Council and Service Directorates
- Alignment: with NZ Health Strategy, Transform and Sustain, HBDHB Equity Report, MoH Long Term Conditions Dimensions (currently under development)
- Financial analysis of current spend in relation to: the triple aim, live well, get well, stay well strategy in line with generic spend and spend on the top 5<sup>4</sup> Long Term Conditions inclusive of mental health and wellness across the board.
- Iterations x 16 of framework in response to findings
- Development of the Long Term Conditions Service Review Matrix
- First Draft presented to EMT and CAG (8<sup>th</sup> & 9<sup>th</sup> November)

###### Nov- Dec (in progress)

- First Draft presented to committees; Clinical Council, MRB<sup>5</sup>, Consumer Council
- Revision of documents in response to committees feedback

##### Stage 2: Jan – Mar 2017

- Develop easy read version written with a health literacy lens so that consumer may engage with the framework and provide feedback
- Completion of patient x 5 tracer audits by QIPS team member (Val Guay)
- Advisory group formed (MDT)
- Analysis of tracer audits
- Review modification and finalising of Service Review Matrix (SRM)
- Trial of Framework and LTC - SRM with Respiratory and Diabetes Services
- Develop program of workshops for the socialisation of the framework and utilisation of the SRM with service planning and reporting cycles

##### Stage 3: April 2017

- Finalise Document
- Finalise the easy read version
- Develop a consumer evaluation tool

<sup>3</sup> The evaluation tool – LTC Service Review Matrix has been developed in draft conceptual form – awaiting formation of the LTC Advisory Group to inform its final content.

<sup>4</sup> The Top Five Long Term Conditions are; Cardiovascular Disease, Cancers, Respiratory, Musculoskeletal, and Diabetes.

<sup>5</sup> Māori Relationship Board

**Stage 4: May 2017**

- Launch document
- Socialise with MoH
- Commence program of implementation developed in Stage 2:

**Stage 5: Ongoing**

- Monthly to quarterly meetings of Long Term Conditions Advisory Group

**Function:**

- Evaluation of current trends (qualitative and quantitative data analysis – cross sector)
- Form recommendations to services against findings
- Monitor progress against findings
- Provision of leadership and management advice
- Connect regionally and nationally to inform current and future planned work practices

**5. THE FRAMEWORK:**

**Contents List**

**Long Term Conditions Framework**

- Appendix One - Long Term Conditions Service Review Matrix (LTC-SRM)
- Appendix Two - Application of the HEAT assessment
- Appendix Three - Consultation Record
- Appendix Four - Consumer Feedback Summaries
- Appendix Five - Financial Summary

## Hawke's Bay DHB Long Term Conditions (LTCs) Framework

### Executive Summary:

**Why do we need a Hawke's Bay Framework** - Long Term Conditions have become the most significant cause of death and disease contributing to; to 80% of deaths and 80% of the health budget spend. Hawke's Bay is above the national prevalence level in 6 out of 11 chronic disease risk factors for adults aged 15 years and over<sup>2</sup>. This has a significant impact on individuals, whanau and the wider community.

**The structure of the framework is** - Based on the Four Aka (roots); Person-Family-Whanau Centred Care, Person centred systems and processes, Workforce development and enablement and Risk identification and mitigation. Each of the Four Aka have four contributing dimensions (see pages 8-11 below). Where appropriate the outcome attached to each of the dimensions is linked to both System Level Measures and the outcomes (currently draft) of Transform and Sustain. The methodology for change on which the framework is based is IHI Improvement Methodology. This is an outcomes based methodology that works through setting up manageable (small) change environments that lead to system wide improvements.

**System wide improvement – implementation tool.** The Long Term Conditions **Service Review Matrix (LTC-SRM - Appendix One)** is a self-review tool, against which services can evaluate their achievement against the four Aka. The SRM is structured around a continuum of excellence

With the support of QIPS facilitators et.al, services will;

- be invited to work within a multi-disciplinary approach to addressing Long Term Conditions
- assess where they sit on the LTC-SRM using agreed sources of evidence
- utilise service planning and reporting mechanisms to work towards shifting performance within the continuum towards excellence.

**The LTC-SRM serves also as a global assessment tool** - for where services across the sector (both primary and secondary) sit in relation to performance against LTC outcomes. (See page 11 of Appendix One). This will provide a helicopter view of where additional resources and support need to be placed within the sectors to move performance from entry level to excellence.

**The framework is NOT disease specific** – People often experience more than one chronic condition and associated mental health challenges. We need to promote holistic care of the person and their whānau in a stay well – get well – be well model.

**Prevention vs intervention** – the framework is focused on prevention, early intervention and management as a strategy for reducing the increasing demand on acute hospital based services. Self-care and self-management underpins the framework so that people choose well in relation to addressing their own health needs. Based on business intelligence modelling of population trends coupled with a shift of emphasis to early intervention, it is anticipated that a reduction of up to 4% demand on acute services can be achieved. This will be evidenced through; reduced ED presentations, reduced ED admission rates and reduced length of stay. Over a 5 year period that will equate to resource economies of 20%.

## The Four Aka

### Person - Family - Whānau Centred Care

- Consumer voice
- Health Literacy
- Self-Care
- Understanding the determinants of health

### Person Centred Systems and Processes

- Health and Social Care networks
- Models of care development
- Collaborative clinical pathways
- Integrated IT systems and enablement

### Workforce Development and Enablement

- Clinical Leadership
- Clinical expertise
- Workforce capacity and capability
- Inter-sectoral development

### Risk Identification and Mitigation

- Population health
- Equity
- Continuous quality improvement
- Governance and advisory support

## Section One: Why do we need a strategy?

### What do we know?

**Context and definition:** Long term chronic conditions are defined by the **World Health Organisation** as having one or more of the following characteristics: they are permanent, leave residual disability, are caused by non-reversible pathological alteration, require special training of the person for rehabilitation, or may be expected to require a long period of supervision and care (WHO. 2005. Preventing Chronic Disease) refer: <https://www.rnzccp.org.nz/assets/documents/Training-and-Beyond/Curriculum-Documents-2014/Long-term-Conditions-CS.pdf> . Not all LTCs are precipitated by lifestyle factors, some are genetic, such as cystic fibrosis. LTCs can originate at birth or in childhood and persist into adulthood.<sup>6</sup> Minimising the impact of Long Term Conditions on our populations' health requires of us attention to what can be prevented and or minimised through mitigation of risk, minimisation of harm and early and effective intervention and management strategies.

**The effects of LTCs for the Individual:** Long term conditions impact greatly on quality of life, independence and economic wellbeing. The psychological aspects of dealing with long term conditions can be considerable, varying from dealing with personal response to the disease; coping with treatment; feeling of lack of personal control and handling the responses of others. People with multiple morbidities risk experiencing poor coordination of treatments primarily designed to address single conditions.

**For the health and care system:** It is predicted by the World Health Organisation that chronic conditions will be the leading cause of disability by 2020 and that if not successfully managed will become the most expensive problem for health care systems.

**Chronic disease is a major contributor to the life expectancy gap** between Māori and Pasifika and Non Māori and Pasifika peoples<sup>7</sup>

**15%** of the population of Hawke's Bay have one or more Long Term Condition<sup>8</sup>

An estimated **80%** of health care funds are spent on chronic disease<sup>9</sup>

**80%** of all deaths in NZ result from chronic conditions.<sup>10</sup>

**Getting serious about eliminating health inequity:** Māori and Pasifika should not be disproportionately represented within this population group<sup>11</sup>. They should not expect to have much higher levels of chronic disease at a much earlier stage in life<sup>12</sup> than Non Māori. Māori and Pasifika have the right to expect the same life expectancy, morbidity and mortality rates as Non Māori.

<sup>6</sup> Referenced to the developing draft Long Term Conditions Service Specifications – Ministry of Health.

### My Challenge - Your Challenge - Our Challenge

The health of our population changes dramatically when we approach 35yrs of age.  
To make a difference we need to begin at birth, working with our partners across all sectors, all disciplines

### Starting now

Our way of working will be sustainable.  
Our focus will shift from curative to preventative practices in all aspect of our work and care.

### Focusing on Māori and Pasifika

Getting it right for Māori and Pasifika will mean everyone benefits.  
Find the gap and take action to reduce it.

8.1

**Not just one but multiple conditions present challenges for the individual and the health system:** Increasing numbers of people present with more than one LTC. The rise in the incidence of long term conditions can be attributed to an increase in lifestyle risk factors (refer snap shot one – page 5) an ageing population with associated increased levels of frailty, and the socioeconomic determinants of health. People with multiple long-term conditions have markedly poorer quality of life, poorer clinical outcomes and longer hospital stays, causing them to be the most costly group of patients.<sup>13</sup>

**Mental health and well-being is a challenge faced by all with a long term condition.** It is a long term condition that will impact significantly on the health outcomes of our population.

**Prevention and early intervention need to be the focus of the Long Term Condition Framework;** the majority of long term conditions are preventable or could be better managed. Elimination of modifiable risk factors would prevent 80 percent of premature heart disease, 80 percent of premature stroke, 80 percent of type 2 diabetes and 40 percent of cancer.<sup>14</sup>

Prevention should be the focus of all aspects of Long Term Condition Management; prevention of expectation of occurrence, prevention of occurrence, prevention of exacerbation of risk factors, prevention of deterioration in health and wellbeing, prevention of increasing levels of acuity.

Prevention is about the individual and the health system working in partnership to fund and provide appropriate access to resources, activities and expectations that promote self-care – self management from a cradle to the grave. It is supporting a system that “empowers the patient to take a lead role in managing their health and ensuring access to the range of services and resources required to achieve optimal outcomes (WHO, 2002)

29 November 2016		7

**A non-disease person centred framework - The need to reduce health inequalities is a priority.** Considerable health inequalities occur between population groups due to many factors including; historical, cultural, socio-economic status, geographical place of residence, ethnic identity, and gender. Long term chronic conditions account for a higher proportion of illness and deaths among Māori, people on low incomes and Pacific peoples than among the general population. New Zealand studies have identified organisational, human resource, and person-community issues in access to health care as barriers for care<sup>15</sup>.

**Less focus on disease (medical diagnosis) and greater focus on the person as a whole:** Current service provision, is still weighted towards disease diagnostics but there needs to be a shift from reactive to managed care within a social, cultural and economic context. There needs to be a greater emphasis on prevention, early intervention, self-management and improved cross sector integration (inclusive of social services, education, housing and justice) and relationships. The emphasis needs to be on the person and their families/whānau being partners in their care.

Model of care delivery is now gearing up to meet the needs of the population by stratifying it by risk rather than by disease. This predicates the requirements for care and will determine the design of workforce capacity and capability.

### Section Three: The Four Aka

Key: SLM – System Level measures | c-SLM – Contributing Measure

Person - Family - Whānau centred Care	Components of each aka	Objectives	Process measures	Outcome (Draft) Transform and Sustain
	Consumer voice	Consumers are integral to the design and evaluation of services	<b>Consumer input is demonstrated in service level planning and reporting</b> <ul style="list-style-type: none"> <li>Consumer feedback mechanisms in place (<i>number + variety</i>)</li> <li>Complaints trends analysis (<i>utilising the WHO<sup>16</sup> taxonomy of categories</i>)</li> <li>Service level plans demonstrate response to consumer voice</li> </ul>	Power balance shifted more in favour of consumers
	Health Literacy	Health literacy improvements enhance access and navigation to health services by the consumer	<b>Health information is consumer / user focused</b> <ul style="list-style-type: none"> <li>Utilisation of consumer experience surveys (c-SLM)</li> <li>GP practices offering an e-portal</li> <li>Consumers engaged in self-management/rehabilitation programs</li> <li>DNA rates-Outpatients / GP LTC consults</li> </ul>	Consumers access understandable information & enabled to take action
	Self-Care	Consumers are supported to self-manage to their highest level of confidence	<b>Proactive Utilisation of Health services</b> <ul style="list-style-type: none"> <li>+7 ED presentations (<i>acute</i>)</li> <li>Referral rates to accredited self-management programs</li> <li>Reduction in ASH rates (SLM)</li> <li>Reduction in readmission rates (SLM)</li> </ul>	Consumers equal partners in their health care and engaged in their own treatment ( <i>management</i> )
	Understanding the determinants of health	Health professionals implement clinical and cultural competence <sup>17</sup> health strategies based on an understanding of the determinants of health	<b>Completion rates of Mandatory training</b> <ul style="list-style-type: none"> <li>Treaty of Waitangi Responsiveness</li> <li>Cultural competency</li> <li>ACE assessment</li> <li>Health Literacy modules (Primary)</li> <li>Relationship Centred care training</li> <li>Utilisation of Patient and clinical activation measures<sup>18</sup></li> </ul>	Services are aligned to community need

<sup>16</sup> [http://www.who.int/patientsafety/taxonomy/icps\\_full\\_report.pdf](http://www.who.int/patientsafety/taxonomy/icps_full_report.pdf)

<sup>17</sup> Cultural competence is a set of congruent behaviours, attitudes, and policies that come together in a system, agency or among professionals and enable that system, agency or those professions to work effectively in cross-cultural situations. Refer: Cross T, Bazron B, Dennis K, Isaacs M. Towards a Culturally Competent System of Care, Volume I. Washington, DC: Georgetown University Child Development Center, CASSP Technical Assistance Center, 1989. Ewen S. Cultural Literacy: An Educational Approach for Health Professionals to Help Address Disparities in Health Care Outcomes. Journal of Australian Indigenous Issues 2010; 13(3); 84-94.

29 November 2016		9

<b>Person centred clinical systems and processes</b>	<b>Components of each Aka</b>	<b>Objectives</b>	<b>Process measures</b>	<b>Outcome (Draft) Transform and Sustain</b>
	<b>Health and Social Care networks</b>	Collaborative networks developed providing services closer to home utilising a MDT <sup>19</sup> and inter-professional approach.	<b>Consumer/community focused outcomes aligned to all contracts</b> <ul style="list-style-type: none"> <li>Establishment of Service Level Alliance Agreements</li> <li>Establishment of Health Network Leadership Teams</li> <li>Health Sector aligned to Results Based Accountability</li> <li>Outcomes based evaluation framework attached to all contracts</li> <li>Multi agency performance reporting</li> </ul>	<b>Joint leadership between DHB, providers, community and (government) agencies</b>
	<b>Models of care development</b>	Building health services around the person using a whānau ora model of care and whole of workforce approach.	<b>Inter disciplinary whole of sector model of care</b> <ul style="list-style-type: none"> <li>HBDHB Workforce framework completed</li> <li>Individual workforce strategies align to population health needs<sup>20</sup></li> <li>Interdisciplinary teams involved in patient care planning</li> <li>Transfer of care process results in reduced (re) admission rates (c-SLM)</li> <li><b>Reduction in Amenable Mortality (SLM)</b></li> </ul>	<b>Consumers access quality care which enables them to manage their own health needs</b>
	<b>Collaborative Pathways</b>	Providing consistency and equity in the delivery of care for our consumers based on best practice	<b>Ongoing development, implementation and review of collaborative pathways</b> <ul style="list-style-type: none"> <li>Timely access to services (diagnostics, FSAs, ..... ) (c-SLM)</li> <li>Clinical utilization rate of pathways/referrals</li> <li>Referral decline rates</li> <li>(timely) Transfer of care</li> <li><b>Reduced Bed days (save 4000 beds) (c-SLM)</b></li> <li><b>Disease detection and follow up rates (c-SLM)</b></li> </ul>	<b>Consistent timely provision of services results in enhanced health outcomes and efficient use of resources</b>
	<b>Integrated IT systems and enablement</b>	Information Systems, and IT are easy to use, accessible and utilised at all levels for the purpose of system wide improvement.	<b>IT supports efficiencies</b> <ul style="list-style-type: none"> <li>Utilisation rates of IT patient /population information systems e.g. Dr Info – Karo Reports – Disease registers – population stratification – Service Utilisation statistic</li> <li>Utilisation of shared patient care records</li> <li>Utilisation of e-referrals (internal to DHB- Primary care)</li> <li>....</li> </ul>	<b>Appropriate and easy access to information for patients clinicians and management</b>

<sup>19</sup> MDT: Multi-Disciplinary Approach (Health, social and community based services)

<sup>20</sup> Population health profiling is used to proactively stratify the population to enable effective preventative and early intervention management.

Version: 16 (Final Draft)	...Strategy Development	Author: Leigh White & Jill Garrett
29 November 2016		10

<b>Workforce Development and Enablement</b>	<b>Components of each Aka</b>	<b>Objectives</b>	<b>Process measures</b>	<b>Outcome (Draft) Transform and Sustain</b>
	<b>Workforce capacity and capability</b>	The capacity and capability of the work force aligns with the population health needs and demand.	<b>Workforce able to respond to health service needs</b> <ul style="list-style-type: none"> <li>Population stratification data utilised for service design</li> <li>Service workforce mapped – capacity and capability current and future state</li> <li>Recruitment and retention rates</li> <li>Professional development alignment to service needs</li> </ul>	<b>Workforce able to respond to the needs of the Hawke's Bay Population</b>
	<b>Clinical leadership</b>	Identified clinical leaders provide direction, support and accountability for the uptake and dissemination of best practice models to optimise patient care.	<b>Services are supported with expert and innovative clinical leaders</b> <ul style="list-style-type: none"> <li>Membership of clinical bodies / leadership forum</li> <li>Participation in LTC regional-national - international congress</li> <li>Delivery at LTC fora</li> <li>Publication and research</li> </ul>	<b>Recognition nationally as Leaders in Long Term Conditions prevention and early intervention methodology (Māori)</b>
	<b>Clinical expertise</b>	Clinical staff, medical and nursing and allied health, provide services to the top of their scope supported by best practice guidelines under the direction of identified clinical leaders.	<b>Clinical best practice and expertise is supported</b> <ul style="list-style-type: none"> <li>Service workforce strategy in place</li> <li>Alignment of workforce strategy with IDT approach</li> <li>Clinical lead pathway identified and utilised for staff development / incentives</li> <li>Consistent management and skills sets supported by new training.</li> </ul>	<b>Clinical expertise is recognised within the organisation</b>
	<b>Inter-sectoral development</b>	Patient care is maximised through the utilisation of an Interdisciplinary Team (IDT) approach to individualised care inclusive of the lay workforce.	<b>Coordinated partnership approach to patient care</b> <ul style="list-style-type: none"> <li>Care teams utilising a shared record</li> <li>Customer focused performance reporting</li> <li>Aligned models of care and funding models</li> <li>Care teams extend outside the health sector ( patient determined)</li> </ul>	<b>Coordinated partner approach to deliver of services with consumer (across agencies)</b>

Risk identification and mitigation	Components of each Aka	Objectives	Process measures	Outcome Transform and Sustain
	Population health	Validated risk profiling is used to support and understand the needs of the population and manage those at risk.	<b>The system is responsive to the population</b> <b>To be completed by Population Health Teams including...</b> <ul style="list-style-type: none"> <li>• Determinants of health</li> <li>• Population risk stratification</li> <li>• Service utilisation</li> <li>• Co design models in place</li> </ul>	Elimination of the Health Equity Gap
	Equity	The gap in consumer health outcomes is addressed actively through targeted approaches to the delivery of care.	<b>The system is responsive to the population</b> <b>To be completed by Māori / Pasifika Health Teams including...</b> <ul style="list-style-type: none"> <li>• IDT planning and reporting demonstrate tailored responses to Māori health needs</li> <li>• .....</li> <li>• .....</li> </ul>	
	Continuous quality improvement	Innovative practice is supported. Recognised improvement methodologies are used to achieve evidence based enhanced patient outcomes.	<b>Change is supported by agreed methodology for improvement</b> <b>To be completed by QIPS Teams including...</b> <ul style="list-style-type: none"> <li>• IDTs collectively using agreed methodologies for planning and monitoring improvement</li> <li>• Celebration of innovative best practice that is evidence based</li> <li>• Uptake of research and development initiatives</li> <li>• Quality Improvement initiatives cross service boundaries</li> </ul>	Quality improvement cycles imbedded within and across all teams of practice
	Governance / advisory support	The support of an advisory group is used to evaluate services and advise on service design and improvement	<b>Change is supported by an Interdisciplinary Advisory</b> <b>To be completed by yet to be formed Advisory Team</b> <ul style="list-style-type: none"> <li>• .....</li> <li>• .....</li> <li>• .....</li> </ul>	

## Section Four: The Methodologies that Informed the Framework

The Hawke's Bay District Health Board – Long Term Conditions Framework aims to operate from a strengths based approach. This involves looking at and for opportunities to change and improve through utilising existing expertise, systems and relationships. Highlighting high functioning, customer focused coordinated responsive care. What the framework aims to do through the **Service Review Matrix** (Appendix 4) is identify areas of excellence for the purpose of disseminating best practice within our local context, and utilise the following methodologies to effectuate change.

### **Appreciative Inquiry (AI) – creating a positive atmosphere for change.**

[Appreciative inquiry](#) is a change management approach that focuses on identifying what is working well, analysing why it is working well and then doing more of it. The basic tenet of AI is that an organization will grow in whichever direction that people in the organization focus their attention

Appreciative Inquiry is about the co-evolutionary search for the best in people, their organizations, and the relevant world around them. AI involves the art and practice of asking questions that strengthen a system's capacity to apprehend, anticipate, and heighten positive potential. AI paves the way to the speed of imagination and innovation; instead of negation, criticism, and spiralling diagnosis, there is discovery, dream, and design. AI seeks, fundamentally, to build a constructive union between past and present capacities: achievements, assets, unexplored potentials, innovations, strengths, elevated thoughts, opportunities, benchmarks, high point moments, lived values, traditions, strategic competencies, stories, expressions of wisdom, insights into the deeper corporate spirit or soul-- and visions of valued and possible futures. Taking all of these together, AI seeks to work from accounts of a "positive" change core.

### **Results Based Accountability: Not just measuring results – partnering up with those who contribute to a collective (agreed) outcome**

[Results-Based Accountability™](#) (RBA), also known as Outcomes-Based Accountability™ (OBA), used by organisations to improve the performance of their programs or services. It recognises that 'trying hard' outputs driven models, do not always result in anyone being 'better off'. RBA uses a data-driven, decision-making process to help (communities and) organisations get beyond talking about problems to taking action to solve problems. The strength of the framework is identifying partnerships and working together for the achievement of a common goal.

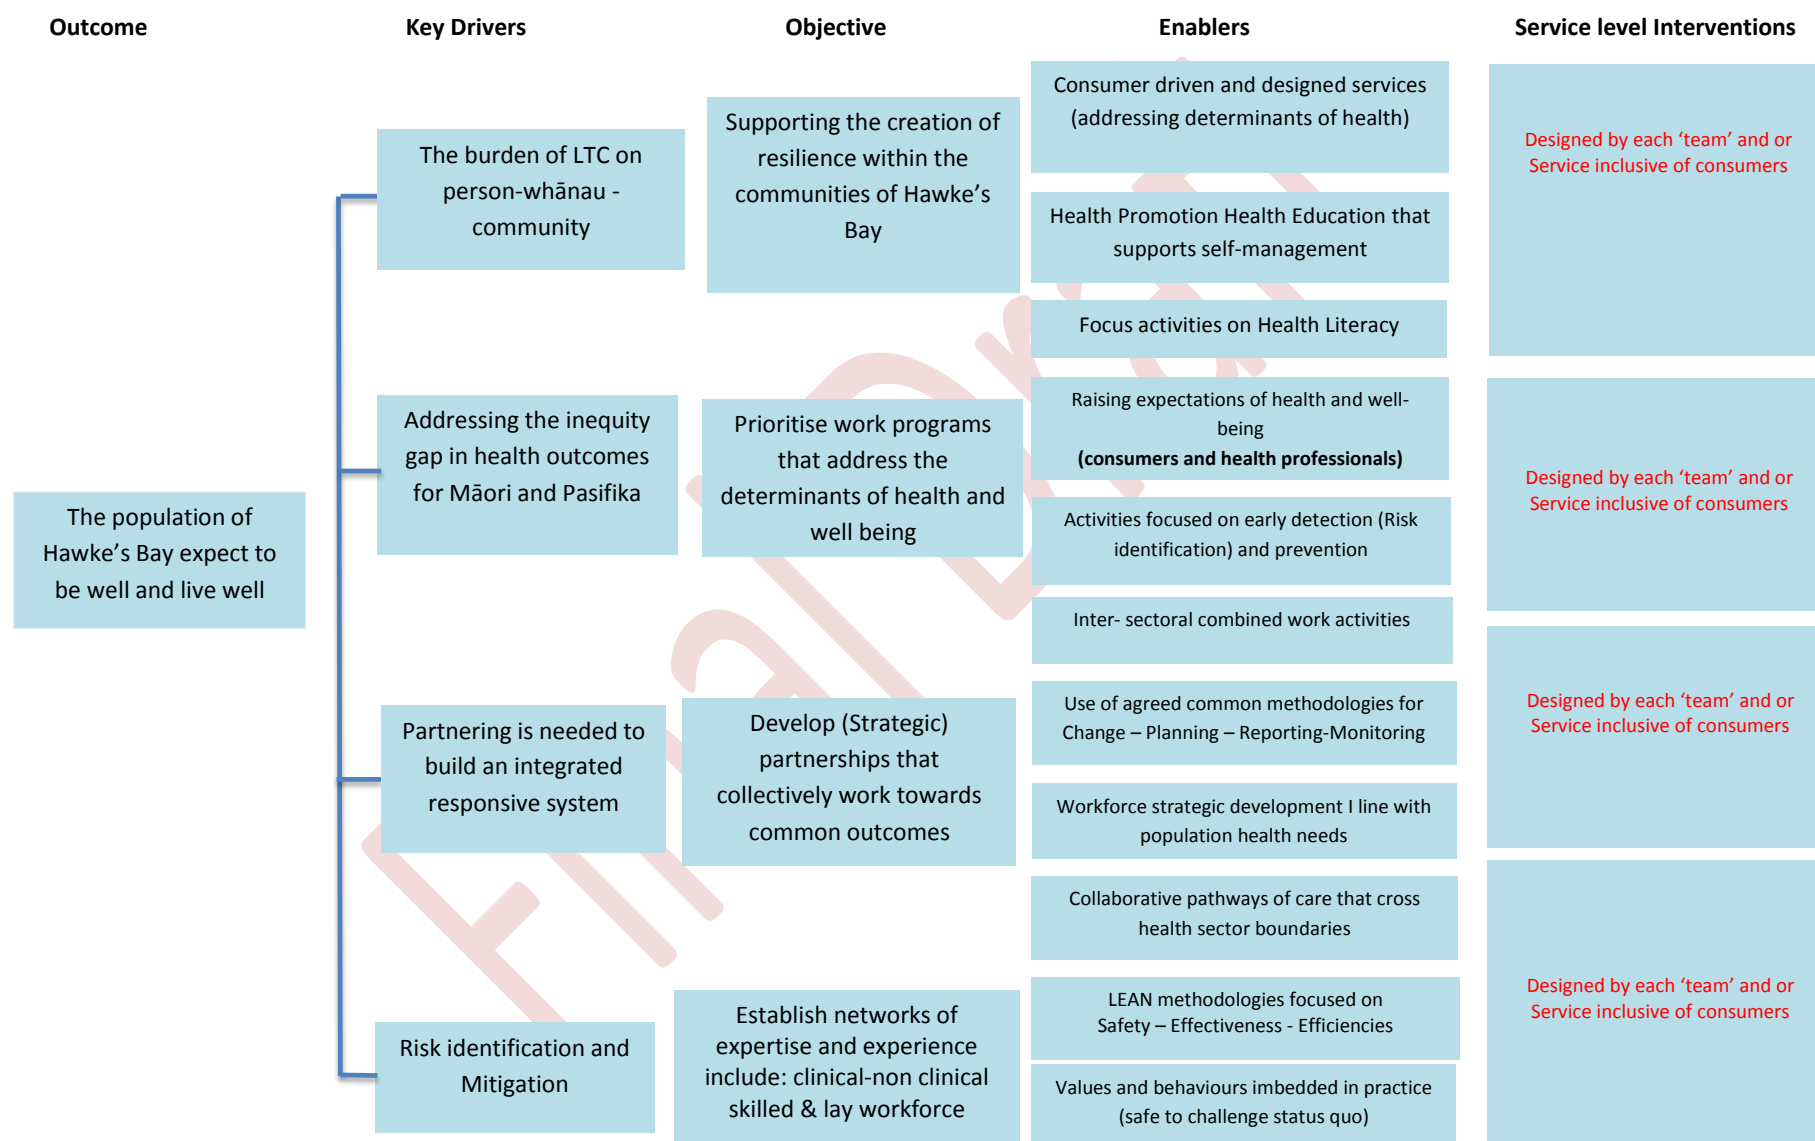

### **IHI Improvement methodology: Testing ideas-theories in controlled environments vs whole of system change**

The Model for Improvement, developed by [Associates in Process Improvement](#)<sup>21</sup>, is a simple, yet powerful tool for accelerating improvement. This model is not meant to replace change models that organizations may already be using, but rather to accelerate improvement. The model has two parts; three fundamental questions which can be addressed in any order (refer Service Review Matrix<sup>22</sup>); What are we trying to accomplish, How do will we know a change is an improvement and What change can we make that will result in improvement? The strength of this cycle is it identifies specific aims, establishes quantitative measures associated with an agreed outcome (improvement) using those who use and work in the system. It does not call for whole of system change- but tests environments and builds on successes that have been achieved.

## Strengthening an Integrated Approach to Patient Care

8.2

### Background

This matrix has been developed in alignment with the Long Term Conditions Framework and in response to the need to provide an evaluative framework on which to base decision making when a service/provider:

- a) evaluates performance against the Four Akas,
- b) maps service capacity inclusive of both strengths and areas for development
- c) economically and strategically aligns the distribution of resources and support

### The Purpose

The self-review matrix is to build internal capacity within an organisation/service to self-evaluate and self-design areas for improvement. By using internal expertise with the assistance of critique of an external provider (in this instance the PHO quality leader and quality support team members or in DHB QIPS team). The process of self-evaluation and review follows the plan, do, study act model (Appendix 1) and is underpinned by results based accountability i.e. outcomes focused.

### Suggested methodology

The quality review matrix is designed as a proactive evaluation framework based on evidence based thinking methodologies; results based accountability and the PDSA cycle of review.

**1. Champion Resources (CR)** are identified within each work area but should consist of no less than; x 1 GP/Consultant, x 1 Service Nurse/Registered Nurse x 1 Service Manager/Clinical Nurse Manager. **A Quality Leader (QL)** from the PHO/DHB QIPS are identified for each Service.

**2. Resources** - change management, facilitation, interview skills can be utilised to host learning conversations <http://www.infed.org/thinkers/argyris.htm>

### 3. Suggested steps for CR and QL

- Work through the quality review matrix, using resources above in particular having the conversations where they feel what best fits against the component parts of the four akas.
- Assign evidence to substantiate conclusions in line with evidence that has been identified in the matrix. Identify and prioritise areas for improvement. Each performance indicator; competent, proficient and excellent are divided into two levels by a number. The **lesser** number indicates **working towards** achieving at this level and the **greater number** indicates **working at this level**.
- Findings are mapped for each work area. The results can be used to strategically and economically allocate resources, determine both individual service support and support to be provided collectively to groups of services with areas in common for development.
- Develop an action plan to address the areas for improvement, resources needed, support required, and time frames to achieve success against the identified indicators.

LTC Service (Self) Review Matrix	3   Page
Version 2: 28.10.16	Authors: Jill Garrett – Leigh White

The Four Aka		Components of each Aka	Notes
Aka Tahī	Person-Family-Whanau centred Care	Consumer Voice	Consumer Council and Clinical Advisory Group (PHO)
		Health Literacy	QIPS
		Self-care	Imbed work
		Understanding Determinants of health	Public Health Unit, Maori Health
Aka Rua	Person centred clinical systems and processes	Health and Social Care Networks	MOH Priorities
		Models of care development	PHO
		Collaborative Pathways	Between Providers. Integration/Outcomes
		Integrated IT systems and enablement's	IT, Business Analyst
Aka Toru	Workforce Development and Enablement	Workforces capacity and capability	Workforce Development – unregulated, careers
		Clinical Leadership	Attraction and retention of high performing staff – Nursing workforce development
		Clinical Expertise	
		Intersectoral development	Integration work with NHSP – DHB-PHOs
Aka Wha	Risk Identification and mitigation	Population Health	Public Health Unit
		Equity	HEAT
		Continuous quality improvement	Between Providers. Outcomes Focus. Show casing the 'success – bright spots' in achieving area based integration.
		Governance/advisory support	Advisory group

**Definitions:**

**Service** Generic identifier of a range of health provision agents which include hospital based services – community services – general practice

**Performance Indicators:****Table 1.0 - Global Indicators (vs Individual Indicators in Table 1.1 – below)**

Excellence		Improvement		Entry	
6	5	4	3	2	1
Services exhibit a systems wide approach and can be recommended as champions <b>to lead in ALL Akas.</b>		A service that is functioning at this level exhibits good practice in most areas and has evidence to support their <b>working towards a systems based approach - in ALL Four Akas</b>		A service that is functioning at this level exhibits areas of <b>good practice but this is reliant on individual staff vs. a systems based approach</b>	
<b>Service can provide a body of evidence to support:</b>		<b>Service can provide a body of evidence to support:</b>		<b>Service can provide a body of evidence to support:</b>	
Highly responsive to both person and population health outcomes.		Responsive to the person's voice and demonstrates a proactive approach to gaining feedback.		Responsive to the person's voice and demonstrates a approach to gaining feedback.	
Strategies that have a focus on person/family/whanau centred care.		Some integrated models of care being used, e.g. interdisciplinary teams with appropriate utilisation of all services.		Has plans in place to develop integrated models of care to support consumer access.	
Proactive engagement with external health providers enhancing outcomes (through a whanau ora approach).		Some vertical and horizontal integration in place, with dedicated CQI activities.		Minimum standard sets that have been externally validated have been achieved e.g. Cornerstone Accreditation (Primary Care), QA Health Standards Secondary Care).	
Seamless vertical and horizontal integration in place, with dedicated CQI activities.		Attainment of 80% of System Level Measures/ Operational Targets (DHB).		Attainment of 70% of System Level Measures/ Operational Targets (DHB).	
Attainment of 100% of System Level Measures/Operational Targets.		Engagement and utilisation of clinical and support E-tools.		Engagement and utilisation of clinical and support E-tools.	
Provision of an integrated range of services (both clinical and support, including total engagement with e-referrals, benchmarking etc.).		Workforce and service planning is being developed.		Provides qualified and experienced workforce at a ratio able to meet the needs of registered population.	
Demonstrates an inter-professional model – of engagement and membership of professional bodies.		Able to provide and support professional student placement.		Serious and sentinel events are managed and reported	
Serious and sentinel events are managed and reported. Shared learnings conducted internally (IDT) and within external forum.		Serious and sentinel events are managed and reported and used for in-service improvements.			

**Table 1.1 – Individual Indicators (vs Global Indicators in Table 1.0 above)**

LTC Service (Self) Review Matrix	5   Page
Version 2: 28.10.16	Authors: Jill Garrett – Leigh White

Aka One	Person-Family-Whanau Centered Care						Evidence
	Excellence		Improvement		Entry		
	6	5	4	3	2	1	
Consumer Voice	<ul style="list-style-type: none"><li>• The service has developed a range of methods to capture feedback</li><li>• Information gathered relates to both generic service and specific areas of work needing a greater focus</li><li>• Causal link between feedback and change within the Service is evidenced - “good ideas”</li></ul>		<ul style="list-style-type: none"><li>• The service has more than three ways to capture feedback.</li><li>• Information from all methods is fed back to the team and used to instigate change.</li><li>• There is growing evidence to show that feedback is linked to change within the service (not solely complaints)</li></ul>		<ul style="list-style-type: none"><li>• Basic questionnaires generating generic feedback is in place.</li><li>• Evidence exists to support feedback being used to implement change.</li><li>• Complaints register content discussed at Service meetings and formative actions taken</li></ul>		Current surveys Consumer engagement in feedback CQI projects Meeting agendas/ action points Complaints register
Health Literacy	<ul style="list-style-type: none"><li>• Staff qualified in providing (health) literacy training</li><li>• Information developed and provided for consumers and staff is critiqued by same</li><li>• Complaints do not include lack of understanding or insufficient information provision</li><li>• Q &amp;A opportunities based on the PDSA cycle - Options grids available for a range of conditions and treatments</li></ul>		<ul style="list-style-type: none"><li>• Planning is evident to ensure all staff are qualified in health literacy</li><li>• Literacy and cultural awareness evident in all health information provided (oral and written)</li><li>• Specific information caters to all population – literacy, culture, age, ethnicity</li><li>• Consumer input is sought when developing (some) forms</li><li>• Q &amp;A opportunities provided and used to inform frequently asked questions – Options Grids</li></ul>		<ul style="list-style-type: none"><li>• Evidence exists to support planning is underway for staff to be trained in health literacy</li><li>• Health Information is provided in a range of formats</li><li>• Input from consumers sought when developing forms etc.</li><li>• System in place that identifies and caters for differing (Health) literacy levels of ALL clients (pictorial, literary, oral)</li></ul>		Patient / health information and documentation  Feedback / feed forward from consumers
Self Care	<ul style="list-style-type: none"><li>• Tailoring self-care models to meet consumers</li><li>• Specific projects/programmes/initiatives demonstrate inclusiveness of consumer</li><li>• MDT staff utilise individual planning e.g. care planning in primary and discharge planning in secondary care</li></ul>		<ul style="list-style-type: none"><li>• Demonstrating ways to ensure that people are actively involved in planning their self-management</li><li>• A shared MDT understanding of what self-management support means.</li></ul>		<ul style="list-style-type: none"><li>• Evidence exists to support planning of the development of models of self-care</li><li>• Isolated evidence where MDT have been formed and utilised</li></ul>		Individual Planning/Discharge Planning  Cycles of CQI
Determinants of health	<ul style="list-style-type: none"><li>• Staff are able to articulate what cultural competence looks and feels like: for staff, for the person and evidenced in feedback mechanisms used.</li><li>• Cultural perspectives are a component in all aspects of planning and analysis.</li><li>• Language is not a barrier to engagement</li><li>• Increased life expectancy for high needs population is identified as an outcome</li></ul>		<ul style="list-style-type: none"><li>• Feedback developed to explore the level of cultural competence within the work place, staff and environment</li><li>• Barriers created by the health Service culture are identified and being addressed proactively e.g. social support systems</li></ul>		<ul style="list-style-type: none"><li>• On-going staff training in place for communication skills - culture specific.</li><li>• At a glance – environment is culturally sensitive ( location and use of space &amp; information and presentation available )</li></ul>		Māori Health Plan Environment Consumer focus groups Feed forward mechanisms Use of language line

Aka Two	Person centred clinical systems and processes						Evidence
	Excellence		Improvement		Entry		
	6	5	4	3	2	1	
Health and Social Care Networks	<ul style="list-style-type: none"><li>Partnerships in health care is evident</li><li>The Networks meet &amp; exceeds all targets on a quarterly basis.</li><li>The Networks have proactively determined further priorities.</li><li>Outcomes for each priority are clearly identified and a plan of action is in place.</li><li>A review process can be demonstrated with the capacity for change</li></ul>		<ul style="list-style-type: none"><li>Achieves within 5-10% of all System Level Measures/Targets in all four quarters.</li><li>Planning is underway in content, method of delivery, duration and target population to form an integrated approach</li></ul>		<ul style="list-style-type: none"><li>Archives (inconsistently) against system level measures</li><li>Identifies areas for development and addresses recommendations.</li><li>Works proactively with guidance to develop an Action Plan.</li><li>Demonstrates improvement over time in areas identified in Service reports</li></ul>		<b>System Level Measures/Targets results</b>  <b>Service Quarterly reports Action Plan</b>
Models of Care development	<ul style="list-style-type: none"><li>All data inclusive in planning</li><li>Partnerships in health care evident</li><li>Total workforce involvement in achieving outcomes</li><li>Using principles as a basis for tests of changes e.g. implement a Stanford Model for all conditions – a model that can be promoted from all sectors</li></ul>		<ul style="list-style-type: none"><li>Gaps known to staff and data is being used to analysis and plan strategies for addressing the gap</li><li>Limited links to other providers</li><li>Demonstrates fundamental transformation of the relationship between a person/carer and provider e.g. consumer satisfaction</li></ul>		<ul style="list-style-type: none"><li>Gaps not known to Service staff</li><li>Few links to other providers</li></ul>		<b>Data analysis Consumer satisfaction</b> <b>What is working well – lean and embed</b>
Collaborative Pathways	<ul style="list-style-type: none"><li>Service provides clinical leadership to assist with the development, publishing and socialising of pathways</li></ul>		<ul style="list-style-type: none"><li>Service provides clinical staff to assist with the development, publishing and socialising of pathways</li></ul>		<ul style="list-style-type: none"><li>Identifies staff for potential assistance with collaborative pathways</li></ul>		<b>Number of pathway participation</b>
Integrated IT systems	<ul style="list-style-type: none"><li>Improvement cycles well evidenced to embrace new technology e.g. patient portal, patient held records, telehealth care (remote via phones, mobiles, internet, videoconferencing)</li></ul>		<ul style="list-style-type: none"><li>Planning processes are in place to align to technological changes to support telehealth care</li></ul>		<ul style="list-style-type: none"><li>No planning to keep abreast with technology changes</li></ul>		<b>IT systems- Patient Portal,</b>

Aka Three	Workforce Development and Enablement						Evidence
	Excellence		Improvement		Entry		
	6	5	4	3	2	1	
Workforce capacity and capability	<ul style="list-style-type: none"><li>There is a process for the team to measure their competency (advanced) with their consumers and peers.</li><li>Staff turnover / staff rejuvenation are considered as part of sustainability planning.</li><li>Staff development, education and support are mechanisms used to promote a culture of continuous improvement.</li></ul>		<ul style="list-style-type: none"><li>Team and individual performance is analysed to inform areas for improvement and effective use of skill base.</li><li>The culture of the team is forward thinking and achievement focused (e.g. use of unpaid careers/volunteers to assist with caring)</li></ul>		<ul style="list-style-type: none"><li>All staff have a current job description, employment agreement and current annual performance appraisal.</li><li>Performance appraisal &amp; performance management systems are established and utilised to enhance performance and professional development.</li><li>Areas for development are identified and actioned to ensure staff qualifications and experience is commiserate with population health needs</li></ul>		Staff training programs Qualification and registration records Performance appraisals and monitoring Business continuity planning and sustainability of workforce Team functionality analysis
Clinical Leadership	<ul style="list-style-type: none"><li>Members of the service are involved in local, regional or national governance.</li><li>The team search out challenging opportunities to change, grow, innovate and improve.</li><li>Research and risk analysis are explored</li></ul>		<ul style="list-style-type: none"><li>The service has a voice that influences clinical direction external to the Service. e.g. writing submissions, business cases.</li><li>The service has clinical leadership that is a role model to others in the team and external.</li></ul>		<ul style="list-style-type: none"><li>The service has a clinical leadership structure, recognises individual contributions and celebrates team success.</li></ul>		CQI initiatives Staff recognition methods Publication of evidence based articles Governance membership
Clinical expertise	<ul style="list-style-type: none"><li>Clinical and administration staff are supported in working to their scope of practice</li><li>Initiatives are supported and evidence based on population health needs</li><li>Senior Nurses and Nurse practitioners have clinical lead roles.</li></ul>		<ul style="list-style-type: none"><li>Both clinical and admin teams utilise all electronic tools effectively and efficiently.</li><li>Systems and processes are standardised across the team and their adherence audited by clinical and admin leaders.</li><li>There is a direct link between population health needs and professional development plans of staff members.</li><li>Staff to patient ratios are managed effectively (numbers and staff competency)</li></ul>		<ul style="list-style-type: none"><li>All clinical staff belong to a professional body.</li><li>Professional body competencies are met.</li><li>Induction &amp; orientation programs in place</li><li>Reorientation of existing staff carried out as required.</li><li>Support systems are in place for new graduates, locums, newly appointed staff.</li></ul>		Compliance audits Professional Dev. Plans and Education attendance records. Audits of staffing & appointment management Orientation Induction plans
Inter-sectoral development	<ul style="list-style-type: none"><li>The service is represented at a range of professional forums</li><li>Staff present at seminars, workshops and conferences</li><li>Staff research is published</li><li>Demonstrated goal-setting and motivational processes have created positive effects on health behaviours</li></ul>		<ul style="list-style-type: none"><li>Staff attend local and national seminars and conferences pertaining to their role and share the learning at Service and network level</li></ul>		<ul style="list-style-type: none"><li>Staff attend local network meetings on a regular basis to support and share learnings across their network;<ul style="list-style-type: none"><li>Peer review teams</li><li>Service nurse forums</li><li>Service Manager forums</li></ul></li></ul>		Professional network membership Service meeting agendas-minutes Publications

Aka Wha	Risk identification and mitigation					Evidence	
	Excellence		Improvement		Entry		
	6	5	4	3	2		1
Population health	<ul style="list-style-type: none"><li>• The service meets &amp; exceeds all targets on a quarterly basis</li><li>• The service proactively determines further population based priorities (risk)</li><li>• Outcomes for each priority are clearly identified and a plan of action is in place</li><li>• A review process (CQI) can be demonstrated with the capacity for change</li></ul>		<ul style="list-style-type: none"><li>• The service has designed implemented and reviewed a number of strategies</li><li>• Service knows specific population (registration, risk stratification, recalls) health outcomes and are monitoring</li></ul>		<ul style="list-style-type: none"><li>• Data collection is set up correctly to be able to record and retrieve population and individual health data (e.g. read codes, classifications, recall systems, length of stays etc.)</li><li>• Health data is reviewed routinely by the multi-disciplinary team</li><li>• Strategies are being developed to address population health outcomes</li></ul>		<ul style="list-style-type: none"><li>• Data captures</li><li>• Dr Info access and use</li><li>• Equity Data – Maori</li><li>• Health data</li><li>• SLM measures</li><li>• Risk stratification</li><li>• Models</li><li>• CAP</li></ul>
Equity	<ul style="list-style-type: none"><li>• ≥ 3% gap between MPI and NMPI in System Level Measures/Health Targets</li><li>• Improvement cycles well evidenced</li><li>• Partnerships in health care evident</li><li>• Total workforce involvement in achieving outcomes</li></ul>		<ul style="list-style-type: none"><li>• ≥ 5% gap in MPI and NMPI System Level Measures/Health Targets</li><li>• Service data is used to analysis and plan strategies for addressing the gap</li><li>• Limited links to other providers</li></ul>		<ul style="list-style-type: none"><li>• ≥ 10% in MPI and NMPI health targets</li><li>• Few links to other providers</li></ul>		<ul style="list-style-type: none"><li>• MPI vs. NMPI analysis</li></ul> <p>(Not Total vs. Maori)</p>
Cycle of Continuous Quality Improvement	<ul style="list-style-type: none"><li>• Proactively reviews risk factors and uses a range of risk calculators</li><li>• Uses tracer (or other) audit processes to identify areas for improvement</li><li>• Experiences and outcomes are shared with other providers e.g. at professional network meetings / forum</li><li>• Leader in Service Continuity Planning</li></ul>		<ul style="list-style-type: none"><li>• Both electronic audits and internal audit processes are undertaken in an organised plan</li><li>• The whole team or multi-disciplinary quality group is involved in the investigation of all incidents</li><li>• Recommendations following events are used as Quality Improvement activities</li><li>• Management of Major incidents – Emerging Infectious Diseases and Fire are all part of the Services continuity planning and are reviewed and updated 6-12 monthly as required.</li></ul>		<ul style="list-style-type: none"><li>• Accidents, incidents and near misses are recorded routinely and reviewed</li><li>• Meeting agendas/ minutes demonstrate that reduction of harm forms part of CQI cycles (patients and staff)</li><li>• Clinical audit is undertaken and a PDSA is undertaken</li><li>• Best Practice Guidelines form the basis of all programmes and can easily be accessed.</li></ul>		<ul style="list-style-type: none"><li>• Incident reporting</li><li>• Trend analysis</li><li>• Action plans – CQI</li><li>• Service meeting agendas/minutes</li><li>• Action research</li><li>• Peer reviews</li><li>• Clinical audits</li><li>• Compliance audits</li></ul>
Governance and Advisory	<ul style="list-style-type: none"><li>• A culture of continuous improvement exists in all areas and is not reliant on one area or one person for its progression.</li><li>• Achieves and exceeds all targets</li><li>• Self-managing Project Planning</li><li>• Provides leadership in the development of effective programmes that address population health needs</li></ul>		<ul style="list-style-type: none"><li>• Business continuity/service/operational plans are current and review mechanisms in place</li><li>• Achieves within 5-10% of all Health Targets in all four quarters.</li><li>• Self-managing action planning based on recommendations</li></ul>		<ul style="list-style-type: none"><li>• Governance and advisory group formed and meet regularly</li><li>• Achieves (inconsistently) against health targets but within 20% of target</li><li>• Identifies areas for development and addresses recommendations.</li><li>• Demonstrates improvement over time in areas identified in reports.</li></ul>		<ul style="list-style-type: none"><li>• Service meeting agendas/minutes</li><li>• Action research</li><li>• health target results</li><li>• Reports</li><li>• Action Plan</li><li>• Corrective Action Reports</li></ul>

LTC Service (Self) Review Matrix	10   Page
Version 2: 28.10.16	Authors: Jill Garrett – Leigh White

## Appendix One: LTC - Service Evaluation Summary

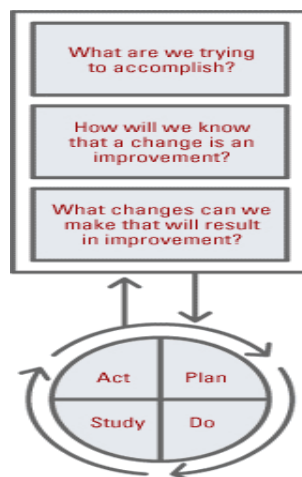

**Purpose:** The Service Evaluation Summary is tool to be utilised to summarise the analysis of the service evaluations. It acts to provide a strategic view; mapping both areas of strength and areas for development. The purpose of which is to globally look at where expertise can be shared across the ‘network of services’, where resources need to be allocated to strengthen capabilities.

[illegible]

## Appendix Two: LTC- Service Review Matrix – IHI Methodology

### Methodology:

#### IHI Improvement Methodology

### 1. PLAN

**Develop a framework** on which to base the evaluation using a rubric of performance indicators.

- Use a three-scale model with each performance indicator divided into two levels.
- The higher number indicates achieved. The lesser number indicates working towards achievement.
- **Competent** is to be viewed as covering the minimum requirements to achieve the health outcomes.

### 2. DO

**Try out an Improvement Theory**

The report and the action plan

- The report should include:
  - performance in relation to each system measures/health targets
  - recognition of Best Practice that has contributed to high performance
  - recommendations for actions to improve service performance in specific areas
- Following the report being compiled staff should discuss and identify areas for improvement and prioritised. **An action plan** is then developed to address the areas for improvement, resources needed, support required and time frames
- **After a period of 2-3 months the resulting outcomes are reviewed**

### 3. Study / Act (is a continuous review cycle)

**Review the results and standardise the improvement**

The action plan and reports are reviewed and assessed:

- which component parts have addressed areas that needed strengthening and **need sustaining as part of business as usual**
- Which component parts have not addressed low performance and therefore need to be revised
- What are the new areas of focus (if any) that need to be added to the action plan
- **After a period of 2-3 months the resulting outcomes are again reviewed**

## Appendix Two: HEAT Assessment

### Management of Long Term Conditions:

**Background<sup>1</sup>:** Key findings from the burden of disease study 2013 tells us that people are living longer with chronic long term conditions which contributes to associated disability and or challenges that face individuals needing to access care or manage their own self-care. Hawke's Bay, has significantly higher risk factors associated with the development of a chronic condition. Māori and Pasifika are over represented within this statistic.

### Understanding Health Inequalities

Type of Inequality	1. What inequalities exist?	2. Who is most advantaged and how?	3. Why did the inequality occur?
Consider the range of inequalities	What do you know about inequalities in relation to this health issue?	Who is advantaged in relation to the health issue being considered and how?	What causal chain(s) lead to this inequality?
Ethnicity <sup>2</sup>	Currently Māori and Pasifika peoples are over represented in all of our Health Risk Factors <sup>3</sup> which are listed in order of risk; Tobacco use, high body mass index, high blood pressure, high blood glucose level and low levels of physical activity. All of these risk factors contribute to premature mortality, increased incidence long term condition and co-morbidity rates. The disparity gap is greatest for smoking and high body mass index.	Female Non- Māori Pasifika (NMPI <sup>4</sup> ) are least represented in the LTC (Generic) cohort, followed by Male NMPI, however this is dependent on the specific condition(s).	Educational levels of females (mothers) is identified as having a high impact on future population outcomes inclusive of health. A 15% gap exists between Māori (70%) and European females (85%) 18yr+ leaving school with NCEA L2 or above. The gap for males is 16%. Education leading to improved choice re employment, housing, lifestyle etc. Influence directly the determinants of health as identified below in this table.

<sup>1</sup> Adapted and taken from "Chronic Disease: Current Situation Analysis- (Prevalence, Morbidity and Mortality)" – Lisa Jones HBDHB Business Intelligence Team

<sup>2</sup> Ethnicity inequality – not counted twice – each separate component...

<sup>3</sup> Risk Factors listed are those identified in the Chronic Disease: Current Situation Analysis(Prevalence, Morbidity and Mortality) – Lisa Jones HBDHB Business Intelligence Team taken from the NZ Burden of Disease Study 2013 and the Health Equity Report – 2016.

<sup>4</sup> MPI-Maori Pasifika peoples vs Non Maori Pasifika (NMPI). This comparison is used to identify that the gap between MPI and NMPI is where health effort needs to be concentrated the most. By comparing MPI with total population we lose sight of the real difference that exists within population health outcomes.

Version: 2	...Strategy Development	Author: Leigh White, Jill Garrett
29 November 2016		13

Type of Inequality	1. What inequalities exist?	2. Who is most advantaged and how?	3. Consider the contributing factors that caused the inequality.
Levels of literacy <sup>5</sup>	Currently only 1:5 New Zealanders are operating at a highly effective level of literacy. The majority of Māori, Pasifika and those from other ethnic minority groups are functioning below the level of competence in literacy required to effectively meet the demands of everyday life.	Research suggests that people with high (health) literacy: <ul style="list-style-type: none"> <li>• are more likely to use prevention services (such as screening)</li> <li>• have more knowledge of their illness, treatment and medicines</li> <li>• are more likely to manage their long-term/chronic condition</li> <li>• are less likely to be hospitalised due to a chronic condition</li> <li>• are more likely to use emergency services</li> <li>• are less vulnerable to (workplace) injury because they understand safety (precautionary) messages.</li> </ul>	<p>Median weekly income by highest qualification and ethnic group for people aged 15 plus (2011)</p> <p>Source: <a href="#">Education Counts</a></p> <p>Education initiatives in the last 10yrs have focused on improving literacy (numeracy) levels with a particular focus for Māori and Pasifika as they are overly represented in the low academic achievement stats, unskilled or low skilled labour workforce, unemployment and involvement with the justice services and utilisation of assisted social services.</p> <p>The inclusion of non-mainstream schools; Kura Kaupapa Māori and charter schools, introduction of NCEA and NZQA standards, and literacy benchmarking attempt to address the disparity that exists going forward, however the legacy of low literacy has had an impact on our current health and quality of life indicators.</p> <p>Low literacy levels can contribute to a lack of confidence in navigating the health systems and social support networks. This in turn contributes to the inability to access the care and support that exists and that one is entitled to.</p>
Health literacy <sup>6</sup>	56% of adult New Zealanders have poor health literacy skills, scoring below the minimum required to meet the needs of the demands of everyday life. Māori who live in a rural location have on average the poorest health literacy skills, closely followed by Māori who live in an urban location. The findings in the <a href="#">Korero Marama</a> report show that overall the majority of New Zealanders are limited in their ability to obtain, process and understand basic health information and services		

<sup>5</sup> Health Literacy is defined as; 'the degree to which individuals have the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions' (Kickbusch et al 2005). [Statistics NZ – level of Adult Literacy](#) and <http://www.healthliteracy.org.nz/about-health-literacy/health-literacy-statistics>

<sup>6</sup> Korero Marama (2010)

Health Literacy (cont.)	in order to make informed and appropriate health decisions.		Systems and processes that have been set up without consumer input in their design, use of consumer feedback post design and analysis of data that demonstrates consumer engagement with services contributes to lack of institutional awareness of the level of (health) literacy of their client base.
Socio economic factors inclusive of wider determinants of health	The social determinants of health are the conditions in which people are born, grow, live, work and age. These circumstances are shaped by the distribution and accessibility of resources at a personal (individual) and population health level. Addressing equity is about unequal distribution of resources in order to advantage the disadvantaged in order to create as close to a level playing field as possible.	Those who enjoy economic wellbeing and resilience gained through, stable and supportive family dynamics, good to excellent educational achievement, employment, and participation as a contributor to local and regional community (networks)	Limiting or limited access to education, employment and or social supports, at a personal or population level contributes to disadvantaged individuals and populations.  Continuous and exponential increases in compromised quality of life indicators will directly impact on the 'resilience' of a family and or community to address, self-manage, create opportunity and work their way out of adversity. Lack of understanding around compounding factors that influence levels of resilience can contribute to inappropriate 'care and or self-care' being prescribed or expected of the person affected by compromised health.
Disability	With the onset of the development of a long term condition the level of ability to manage everyday life activities is affected. Those with one or more comorbidities have the greater challenges to face. Age will impact on the ability of the individual, partner and or whanau to manage the compromised health state of the consumer	Those with good family support, an able bodied partner, access to transportation to access care assistance, financially able to 'buy' assistance required or modify lifestyle to accommodate the condition(s).  Those who have built resilience over time to cope with change and or changes in circumstance. Those who have developed self-managing skills that enable them or their family, network to problem solve presenting issues. Those who are not at saturation point in regard to the compromises they are having to make in-order to maintain a level of wellness that is acceptable to them.	By treating the person/family as a whole and addressing the items that 'matter to the person' instead of the 'condition or what is the matter with them' we will begin to mitigate, minimise and hopefully eliminate the impact that their change in health status has on their ability to enjoy the lifestyle of their choosing.

Type of Inequality	1. What inequalities exist?	2. Who is most advantaged and how?	3. Consider the contributing factors that caused the inequity.
Age - 65+	At the age of 35yrs the prevalence and onset of Long Term Conditions increases. This is particularly relevant to Māori (Female).		Contributing factors that lead to the onset of Long Term Conditions is believed to begin as early as pregnancy. Lifestyle influenced or compromised by low education levels, which contribute to economic well-being impact on the capacity of individuals and whanau to choose well in in terms of health choices.
Gender	There is approximately a 10% differential between (Māori) Male and female risk factors within the HBDHB demographic	Females are advantaged	Screening programs for females and the incidence of attendance of general practice by females presenting with whanau who are unwell has had an impact on female visibility to health professionals. On average attendance differentials between male and females is a 75:25 ratio. Screening is the first point of prevention, risk identification and management. Lack of screening impacts on both the identification of risk factors and the timeliness (acuity) of the person's health status when they engage in and access active management.
Mental wellness <sup>7</sup>	Many people with long term physical health conditions also have mental wellness issues. This can lead to significantly poorer health outcomes and reduced quality of life.	Those with a single long term condition (1:5 of the 4:5 adults who have a Long Term Condition. Those with high levels of resilience, low acuity, early stages and highly skilled in self-management.  Those with high health literacy Those with good whanau support	In providing disease specific health care we overlook the holistic approach that should be engendered with Long Term Conditions. People with long term conditions and co morbid mental health problems disproportionately live in deprived areas and have access to fewer resources of all kinds. The interaction between co-morbidities and deprivation make a significant contribution to generating and maintaining equalities.
Access to health care services <sup>8</sup>	Those living in rural communities.	Those living within easy driving distance to services required. Those living in an area with good mobile / outreach services. Ability and desire of people to have residences in areas with easy access to services.	Residence of choice or determined by full range of health determinants. Economies of scale –as determined financially viable by the DHB Attraction and retention of staff.

<sup>7</sup> The King's Fund and Centre for Mental Health 2012 - [https://www.kingsfund.org.uk/sites/files/kf/field/field\\_publication\\_file/long-term-conditions-mental-health-cost-comorbidities-naylor-feb12.pdf](https://www.kingsfund.org.uk/sites/files/kf/field/field_publication_file/long-term-conditions-mental-health-cost-comorbidities-naylor-feb12.pdf)

<sup>8</sup> This section ONLY covers physical access as all other barriers to access have been identified above e.g. socio economic section/health literacy, gender et. al.

Version: 2	..Strategy Development	Author: Leigh White Jill Garrett
29 November 2016		16

Level	Determinants with associated possible interventions (May or may not be the responsibility of the health system)
Structural:	<p><b>Based on consumer and service feedback gathered in the consultation process (See Appendix 2 – LTC Framework)</b></p> <p><b>Education</b> - Healthy families, confident in their own identity, able to make choices that suit their own individual context is the focus of Ka Hikitia – Māori education strategy, designed for the purpose of Māori achieving success as Māori. Literacy and numeracy project have been introduced to the education system to address underperformance of all students. Valuing kaupapa Māori education – within a Te Ao Māori framework has also been identified as mechanisms to ensure that tailored responses to differing needs within our population are needed instead of the ‘one size fits all’ model of thinking.</p> <p><b>Access points – multiple and varied</b> – consumers consistently repeated the same messages. They want multiple access points to health care/support at varying levels. This included; hours including late nights, early mornings, weekend clinics, and the ability to – phone – email – visit or have someone visit them were needed. The use of IT – web based patient portals were seen as only being advantageous. This was reaffirmed in Wairoa – by and 82yr old male who said “My patient portal is the best thing out – time saver and ease of access to all the information I need. I’m not that stable on my feet so coming in to town can be a real issue.” A recently unemployed forestry worker was quick to mention that he had no time off if working in Forestry to get to the doctor – early morning starts – long hard days – relying on forestry transport all were factors contributing to intermittent access to care.</p> <p><b>Utilisation of regulated health and non-health/non-regulated workforce</b> – the consumers wanted the right people with the right skills to support them in taking care of themselves but what was most important was the right fit of person. Diversification of our workforce (bi and multicultural) was identified as a need. The right fit also extended to what level of expertise was needed and the use of non – regulated workforce to provide levels of care appropriate to the consumer. Youth for example are wanting to engage with people with an affinity for youth issues and do not need to see a GP when their needs can be managed and or coordinated by a range of other staff – Nurse practitioner – Youth social worker – Youth counsellor. Navigation of the system was identified as a need. This can be achieved through advocating for an interdisciplinary team approach to care / support.</p> <p><b>Interdisciplinary approach to care/support – using a wellness model</b> – the Long Term Conditions Framework advocates for an holistic wellness approach to care based on the Four Aka. In order for care not to be focused solely on the condition but on the consumer and whanau leads to the need to have an interdisciplinary approach.</p> <ul style="list-style-type: none"> <li>- <b>Generic approach not disease specific</b> – the incidence of consumers with co morbidities dictated to the framework that what is needed is a generic approach to care. The consumer wants a primary – centralised coordinator of their care that can provide access points to specialist care as and when needed.</li> <li>- <b>Mental health focus:</b> Care for large numbers of people with long-term conditions will improved by better integrating mental health support with primary care and chronic disease management programmes, with closer working between mental health specialists and other professionals. Service commissioning groups should prioritise integrating mental and physical health care more closely as a key part of their strategies to improve quality and productivity in health care.</li> </ul>

Version: 2	...Strategy Development	Author: Leigh White Jill Garrett
29 November 2016		17

<p><b>Intermediate Pathways:</b> <i>Material, psychosocial and behavioural factors. The impact of structural factors on health</i></p>	<p><b>Patient and relationship centred care</b> – is the response that is needed to tailor care and support for consumers that will engender ease of access to all stages in ones’ healthy development. Taking into consideration quality of life measures as well as clinical measures to guide the health workforce and consumer as to ‘what matters to them most’ as a means of directing what type of care is needed – against an agreed set of priorities dictated by the consumer but advised and supported by the health professional.</p> <p><b>Raising consumer expectations</b> – By not accepting that health inequities is an expectation if you are Māori or Pasifika and or in a group that is not experiencing equitable health outcomes ( aged , disabled, living in remote areas, male ) we address the issue from the consumer demand perspectives. This can be achieved through;</p> <ul style="list-style-type: none"> <li>- <b>Dis-establishing myths</b> - that exist about conditions that you should or should not expect if you fall into a particular population or age group.</li> <li>- <b>Raising health literacy</b> - becoming a focus of all information that is shared in a transformational vs transactional manner with the first step of finding out what is ‘known to the consumer’ before exchanging information that is intended to grow that information that will lead to greater understanding and self-determination in decision making</li> <li>- <b>Creating multiple avenues to enhance self-management</b> – by examining and evaluating the paternal aspect to health care provision, based on the level of acuity required of the consumer at any given time, we create the opportunity for the consumer to be the decision maker in their own care. If all the above is considered in the determination of the care and support that is needed then we create the right environment to implement – co designed models of care that have had the receiver and provider of care involved in its design process.</li> </ul>
<p><b>Health and Disability Services</b></p>	<p><b>Flexible services</b> that can respond to variability in baseline health status and needs (mental and physical)</p> <ul style="list-style-type: none"> <li>- (see interdisciplinary teams above)</li> </ul> <p><b>Risk mitigation-</b> Promotion of CQI initiatives that focus on snap shot tracer auditing that examine the pathway / care journey of the patient to identify routinely areas for improvement without them being attached to or a response to an incident – accident or death</p> <p><b>Promoting the use of the Health and Disability advocacy service</b> – and taking learnings from any investigations or cases</p>
<p><b>Impact:</b> <i>the impact on socioeconomic position</i></p>	<p>Work with national, regional and local health promotion teams</p> <p>Work with ACC and other funding bodies that support employment and understanding of the determinants of health for those with a disability</p> <p>Cross-sector initiatives to co-fund tailored packages of care inclusive of MSD as a funder of subsidies and benefits for consumers</p> <p>Fund existing community providers to care for consumers building capacity and capability within our available work force</p> <p>Work with local education providers to inform curricular content, education pathways and career pathways</p> <p>Ensure step-up, step down options and the flexibility to do so within the patient journey of wellness and un wellness.</p>

Pathway (AKA)	Questions	Responses
<b>Tuatahi</b> – <i>Developing whānau, hapū, iwi and Māori communities</i>	<i>How have Māori been involved in the use of HEAT? Have Māori health inequalities been fully considered?</i>	The focus of the framework is to address equity and gap in health outcomes Consumer consultation was representative of our demographic profile for Hawke's Bay. Wairoa – consultation group – 70% Māori and chosen due to its high Maori population as well as high needs in relation to Long Term Conditions. PAG included 3 Māori members Consumer council members represented our rural isolated communities ( Parangahau )

<b>Tuarua</b> – <i>Māori participation in the health and disability sector</i>	<i>How will you involve Māori in the health and disability service interventions? How will you build Māori workforce capability?</i>	Health and disability service: engage the 'right fit of person to work with the individual engaged in any service intervention. Utilise the kaitakwaenga who have recently been appointed within the Maori health team. Ensure consumers know they can request a change of person – should the right fit not be achieved ( Code of Rights )  Workforce development forms part of Aka toru – workforce development and enablement.
<b>Tuatoru</b> – <i>Effective health and disability services</i>	<i>How will you ensure that the health and disability service intervention(s) proposed are timely, high-quality, effective and culturally appropriate for Māori?</i>	Identify this in the service plans and use the driver diagram ( LTC Framework figure 1.0 ) to ensure that activities engaged in by services align to high level outcomes and objectives; example provided is – addressing the inequality gap in health outcomes for Maori and Pasifika with the enabler identified as – prioritising work programs that address the determinants of health
<b>Tuawhā</b> – <i>Working across sectors</i>	<i>How will you work collaboratively with other sectors to reduce Māori health inequalities?</i>	The inter sectoral approach of the health and social care networks in conjunction with the multidisciplinary approach to providing non disease specific care to those with or at risk of having a Long Term Condition.

Questions	Responses
<b>Health inequality outcomes</b>	System level measures and contributing measures identified in Aka Tahi Use of quality of life tools to measure non clinical outcomes for consumers Reduction to within 5% of gap between Māori and non-Māori
<b>Groups Benefiting</b>	Those with long term conditions – who are then able to access interdisciplinary teams and increase their confidence in their self-management.
<b>Unintended Consequences</b>	By focusing on generic approach – specialised care may be impacted on. The time frame leading up to high functioning IDTs may impact on patient care coordination. Workforce capacity and capability to work in a generic approach will need lead in time and to be managed well.
<b>Risk Mitigation</b>	Establish a LTC advisory group inclusive of Māori and Pasifika members Support and monitor service plans and operational management Work closely with the QIPS team to ensure systems for improvement are in place Ensure clinical leads are in place to manage care and coordination of care

29 November 2016		19

**How will you know if inequalities have been reduced?**

By ensuring that all data is presented in MPI vs NMPI (not MPI vs Total population which masks the gap)

- Outcomes measures identified and monitored against each of the “Teams of Practice” or Service targets
- Utilisation of the System Level Measures and the contributing measures to map progress towards agreed outcomes

**Reduction in the gap between MPI and NMPI**

- Across the board

Draft Concept Overview

## Appendix Three: Consultation Record - Long Term Conditions Framework

Health Faculty / Area	Person	Date	Version	Resulting modification to the document
<b>GM – Primary Care CEI- PHO</b>	Mark Petersen / Liz Stockley	July 2016	5	Include MDT approaches (in particular community pharmacies), thread through mental health wellness and youth.
<b>QIPS</b>	Jeannette Rendle/Adam MacDonald	July 2016	5	Resonance consumer voice and health literacy
<b>Maori Health</b>	Patrick LeGeyt	July 2016	5	Meaning of the tree: <ul style="list-style-type: none"> <li>(White pine – roots intertwined/interdependencies)</li> </ul> Need to include HEAT Data to reflect Maori Link Social connectedness
<b>Strategic Services/CFO</b>	Mary Wills, Tim Evans	Aug. 2016	6	On track – aligns Transform and Sustain/Links to Annual Plan/Clinical Service Plans
<b>Medical Directorate</b>	Paula Jones, Colin Hutchinson, David Gardner	Aug. 2016	6	Keep it generic/Link it to Service Plans – Key areas: LTC/CP/Discharge Planning and E-Referrals/People to take ownership
<b>PHO Boards</b>	PPC CAG Innovation & Development Team	August 2016 To be presented August 2016	4 7	Instead of consults – make sure use engagement/ Preventative Model Focus on self-management Data to be inclusive of Pacifica
<b>PHO</b>	Trish Freer, Faye Milner	August 2016	8	Comments: - supportive to work on next phases
<b>Nursing Leadership</b>	Chris McKenna	September 2016	8	Portray engagement with Primary care Workforce
<b>Consumers</b>	Mental Health - PAG		9	Comments captured and documented - Refer to Appendix 2
<b>Consumer</b>	Husband and wife (both with LTCs)	September 2016	10	Comments captured and documented – Refer to Appendix 2
<b>Executive Management</b>	Andy Phillips/Sharon mason	October 2016	12	Relationship Centred Care – Staff Resilience
<b>GP-medical Advisors</b>	Kerryn Lum, KJ Patel, Jane Nash	October 2016	13	Finished product – easy read for all – watch the language and use of it – e.g. SLM? – What does this mean to GPs? /align the funding with diagnostics/capabilities – how will document remain responsive – how will it become real?

Version: 2	...Strategy Development	Author: Leigh White, Jill Garrett
29 November 2016		21

<b>Nursing</b>	Hastings Health Centre Taradale Health Centre	October 2016	12	Framework is structured
<b>QIPS Team</b>	Team members	October 2016	13	Will link to their work – 4000 days campaign
<b>Haurua Heretaunga – Nursing</b>	Julia Ebbett	October 2016	13	What will success look like, definitions of self-care/self-management/thread through ACP/Not more but better/Right language or otherwise will disengage/ use of workforce capabilities in differing ways new roles e.g. navigator.
<b>Consumers - Wairoa</b>	14 consumers attending hui	October 2016	15	Comments captured and documented - Refer to Appendix 3
<b>EMT</b>	Executive Management Team	November 2016	16	Length of document. Order in which information presented. Generalist statements around burden of disease.
<b>EMT</b>	Clinical members of EMT	November 2016	17	Remove snap shot views. Include executive summary. Reframe statements to reflect better utilisation of upstream services vs cost reductions that will lead to reduced; ED Presentations, ED Admissions and Length of Stay.

Generic feedback gained through conversations and interactions with:

- Community members / consumers from Parangahau - Central Hawke's Bay

## Appendix Four: Consumer Feedback Summaries

Aka Tahi	Components of each Aka	Objectives	What would success look like to you if this was done well?
Person - Family - Whanau centred Care	Consumer voice	Consumers are integral to the design and evaluation of services	<b>We want to be:</b> <ul style="list-style-type: none"> <li>Updated regularly – either verbally or in written material</li> <li>Represented on DHB Committees and encouraged to be active and contribute</li> <li>Valued for their contributions. Responses to the voice to be immediate and appropriate.</li> <li>Compensated for our contribution</li> <li>Right person/right fit and to be listened to (there are differing ways to communicate)</li> <li>When making changes they reflect on the consumer – we want to be involved with decision making</li> <li>What is the first language/Te reo</li> </ul>
	Health Literacy	Health literacy improvements enhance access and navigation to health services by the consumer	<b>We want:</b> <ul style="list-style-type: none"> <li>No jargon, simple language e.g. “Pertussis versus whooping cough” or “Influenza – why not just say flu”</li> <li>Talk back concept and sometimes we may want to be in pairs</li> <li>If the literacy is to our level we are more willing to ask for help</li> <li>More assistance with navigator’s e.g. Kaitakawaenga/WINZ/Social Services</li> <li>Knowledge of what other providers can do for us</li> <li>Language line/Health Internet that is readable</li> <li>Up to date information provided for us that includes; <ul style="list-style-type: none"> <li>Welcome packs – informing of length of stays, information for family/whanau, consumer rights,</li> <li>Information about our personal health e.g. medications, our key worker and our key physician and choices if we don’t like the people we are to be cared for etc.</li> <li>Simplistic language about medication management – if you take this, it will do this so what happens</li> </ul> </li> </ul>
	Self-Care	Consumers are supported to self-manage to their highest level of confidence	<b>We want:</b> <ul style="list-style-type: none"> <li>We need to take self-responsibility, manage our own care and be less dependent on health system and make our own choices</li> <li>What matters to me</li> <li>Needs to be holistic</li> <li>Needs to have an outcome</li> </ul>

Version: 2	...Strategy Development	Author: Leigh White Jill Garrett
29 November 2016		23

Aka Rua	Components of each Aka	Objectives	What would success look like to you if this was done well?
Person Centred Clinical Systems and Processes	Understanding the determinants of health	Health professionals implement health strategies based on an understanding of the determinants of health	<b>We want:</b> <ul style="list-style-type: none"> <li>To be treated as a whole person not broken down into departments e.g. medical, mental health etc</li> <li>Acknowledgement that just because I have a mental health issue that it may not be this issue that brings me to care</li> <li>Reassurance that some medical problems are not dismissed or overlooked when seeking help e.g. pain, chronic fatigue, skin problems</li> <li>Reassurance that communication is occurring between Providers of my care – right team of people - is there ethical dilemmas over confidentiality?</li> <li>Take health into the workplace – “we cannot get off work for a day to have a blood test”</li> <li>“No more form” filling – lets us do it once only</li> <li>To connect and have one system – health, social and education</li> <li>Transport – cost of Ambulances</li> <li>Hubs of services together under one roof e.g. NGOs/Heart Foundation/Breathe HB</li> </ul>
	Health and Social Care networks	Collaborative networks developed providing services closer to home utilising a MDT <sup>9</sup> and inter-professional approach.	
	Models of care development	Building health services around the person using a whanau ora model of care and whole of workforce approach.	<b>We want to be:</b> <ul style="list-style-type: none"> <li>Linked up immediately with other agencies that support the healing of a person and plus supports our family</li> <li>Agencies would work as a whole and not in isolation – this means we don’t need to repeat our stories</li> <li>Agencies have the same access to personal records – no replication of information</li> <li>Access, independence and “free”</li> <li>Face to face is important</li> <li>At 82 years I support and can use the patient portal</li> <li>Extended hours of services, not only GPs but pharmacy, laboratory</li> <li>Don’t want to be the “click the ticket” or check for check sake</li> <li>Someone to help us navigate through – so it is seamless</li> </ul>
	Collaborative clinical pathways	Development, implementation and review of clinical pathways that demonstrate integration of care	<b>We think:</b> <ul style="list-style-type: none"> <li>Bringing the Agencies together with the person at the centre – share resources, knowledge and information.</li> </ul>

<sup>9</sup> MDT: Multi-Disciplinary Approach (Health, social and community based services)

	<b>Integrated IT systems and enablement</b>	Information Systems, and IT are easy to use, accessible and utilised at all levels for the purpose of system wide improvement.	<b>We want:</b> <ul style="list-style-type: none"> <li>• Single person record</li> <li>• All to have access to our records in shared way.</li> <li>• Records need to be constantly updated especially when one Agency has information and the other does not know yet</li> <li>• Accuracy of data e.g. READ codes</li> </ul>
--	---	--	--

8.2

<b>Aka Toru</b>	<b>Components of each Aka</b>	<b>Objectives</b>	<b>What would success look like to you if this was done well?</b>
<b>Workforce Development and Enablement</b>	<b>Clinical leadership</b>	Identified clinical leaders provide direction, support and accountability for the uptake and dissemination of best practice models to optimise patient care.	<b>We think:</b> <ul style="list-style-type: none"> <li>• Constant personal development should take place for all staff</li> <li>• Training to be mandatory and staff be on full pay when up-skilling</li> <li>• Clinicians to travel worldwide to conferences and have full access and support to do technical, scientific, medical and humanities training</li> </ul>
	<b>Clinical expertise</b>	Clinical staff, medical and nursing, provide services to the top of their scope supported by best practice guidelines under the direction of identified clinical leaders.	<b>We think:</b> <ul style="list-style-type: none"> <li>• Staff should have access and training to alternatives therapies</li> <li>• Staff should be exposed and supported to learn from other cultures, countries and societies</li> <li>• Clinical leaders should be accountable to consumers groups e.g. PAG and to be flexible and adaptable</li> </ul>
	<b>Workforce capacity and capability</b>	The workforce, inclusive of the lay workforce are able to work at the top of their scope with adequate support from the sector to achieve optimal patient care.	<b>We think:</b> <ul style="list-style-type: none"> <li>• Supervision would be compulsory every 4 weeks for staff working in mental health including nurses, care associates, key workers and clinical team</li> <li>• Supervision should be tailored fit i.e. staff could chose who they would like as supervisor and the supervisor "constant" for contact</li> <li>• On demand supervision would be available when requested by staff</li> </ul>
	<b>Inter-sectoral development</b>	Patient care is maximised through the utilisation of a MDT approach to individualised care.	<b>We think:</b> <ul style="list-style-type: none"> <li>• Every shift should have time for debrief – not only crisis but day to day events</li> <li>• Regular staff meetings</li> <li>• Integration of all Teams (rural not working in isolation)</li> </ul>

Version: 2	...Strategy Development	Author: Leigh White, Jill Garrett
29 November 2016		25

Aka Wha	Components of each Aka	Objectives	What would success look like to you if this was done well?
Risk Identification and Mitigation	Equity	Addressing the gap in patient outcomes is addressed actively through targeted approaches to the delivery of care.	<b>We want:</b> <ul style="list-style-type: none"> <li>• Maori decision making</li> <li>• Recognise the treaty and reflect this in workforce</li> <li>• Funding to address the equity gaps</li> <li>• Wairoa's fit is unique</li> <li>• Address access issues</li> <li>• Better transport for our disability – e.g. a bus that travels to Napier is fit for disabilities</li> </ul>
	Continuous quality improvement	Innovative practice is supported. Recognised improvement methodologies are used to achieve evidence based enhanced patient outcomes.	<b>We want:</b> <ul style="list-style-type: none"> <li>• Person and relationship centred care</li> <li>• Advertise technology to support health needs e.g. "time reminders in phones for insulin"</li> </ul>
	Governance and or advisory support	The support of an advisory group is used to evaluate services and advise on service design and improvement	No Comments recorded

**\*Consumers consulted in this exercise were:** Patient Advisory Group (Mental Health), HBDHB. Consumer Group from Wairoa. Consumer Council members: Graeme Norton. Consumers of services: Rosemary and Terry Marriot, CHB consumer and consumer council members, feedback from Parangahau in relation to CHB Network.

## Appendix Five: Financial Summary

**Purpose:** To provide an indicative base line figure for the current spend in relation to Long Term Conditions. In a strategic landscape – what shift in spending needs to be planned for move the ratio of spending away from acute (Get well) Hospital and (Stay Well) Rehabilitation and Support Services and move towards (Start Well) Prevention and Detection and Management Services over time. **Figures quoted below are - \$000s**

**Shifting resource to support diminished demand on acute services  
through greater utilisation of up-stream services**

8.2

The Current State - Long Term Conditions				
Start Well		Get Well		Stay Well
Prevention	Detection and Management Services	Intensive Assessment and Treatment		Rehabilitation and Support Services
Public Health	Primary Care	Hospital	Out of District	Community
\$5,311	\$7,810	\$22,082	\$27,701	\$6,555
8%	11%	32%	40%	9%

Future State			
20%	20%	60%	10%

Version: 2	...Strategy Development	Author: Leigh White, Jill Garrett
29 November 2016		27

### Financial Assumptions: (Provided by financial accountant)

Long Term Conditions costings have been based on a 15% calculation of the total health spend. This is based on the % population with one Long Term Condition. It is estimated that the prevalence of co morbidities would affect up to 35%. Assumptions therefore had to be made when estimating the costs. See full list of assumptions below:

The top five long term conditions; CVD, Respiratory, Cancers, Diabetes and Musculoskeletal have been used to gauge spend.

Long term Conditions - Primary, Hospital, and Community costings:

A % relating to LTC based on LTC Hospitalisations for HB domiciled patients for 2011 to 2013 as documented in Lisa Jones Report (2015) QIPP LTC Supporting the local implementation of the Year of Care Funding. Model for people with long-term conditions (2012).

Total LTC Hospitalisations for HB domiciled patients 2011 to 2013, Per Chronic Conditions dataset from Business Intelligence

Includes the following: Musculoskeletal Disease, Diabetes Complications- Renal Failure, Diabetes, Ischaemic Heart Disease, Stroke, Asthma, COPD, Cancer (No=17479)

Total Discharges for HB domiciled patients for 2011-2013 (dataset from Business Intelligence) (no=118971)

Note these figures are per HB domicile of patient rather than per location of service which the \$ are based on.

Equates to – estimated 15% of total spend.

Out of district costs are based on IDF data. A full summary is provided in Appendix Five for IDF

Public Health spend is calculated at 100% of budget due to it being too difficult to determine which are LTC and all are preventative and general in nature.

IDFs are classified between various LTC conditions, and therefore no further apportionment is required.

As information is captured at a higher level it is difficult to itemise costs to specific conditions. Therefore, only costs which can be clearly attributed to a specific condition e.g. Haemodialysis to Diabetes are shown under specific conditions. Generic amounts capture costs not able to be itemised.

### Exclusions

Residential Care costs are excluded as typically relate to people over +65 and are difficult for the DHB to control.

Paediatrics (Hospital & IDFs) excluded from analysis as unable to confirm conditions are long term at this stage.

Version: 2	...Strategy Development	Author: Leigh White, Jill Garrett

Research/Literature  
Report on NZ Cost of Illness  
Studies on LTC 2009

#### Coronary Heart Disease

Direct cost \$179 million (Scott: 1993)  
 Direct included: ambulance, hospital, diagnostic tests, private consultation costs, medicine and dispensing costs  
 Hospital stays main contributor of direct costs  
 Direct outnumbered indirect by 10:1  
 Indirect \$14-\$24 million  
 Indirect included: lost productivity, medical research and health promotion  
 Intangible costs: \$114 - \$264 million - calculated by costing the loss of life  
 Under willingness-to-pay approach, intangible costs increased to \$14,568 million

#### Ischaemic Stroke

Direct costs \$93-\$140 million (1992) (Scott and Scott 1994)  
 Direct costs 10 times more than indirect  
 Hospital and continuing care account 90% of all costs

**Research/Literature  
Report on NZ Cost of Illness  
Studies on LTC 2009**

**Arthritis**

NZ Direct costs \$564 million (Arthritis NZ and Access Economics 2005)  
Direct: Health costs represented 1/3 of above  
Indirect costs: \$1,788 million - out weigh direct health costs more than 3:1  
Intangible costs: \$2,560 million

**Osteoporosis**

Direct costs \$1, 159 million (Brown et al (2007)  
Costs dominated by treatment - musculoskeletal, back problems and curvature of spine  
Immediate # treatment and after \$300million - dominated by pharmaceuticals

Report on NZ Cost of Illness  
Studies on LTC 2009

#### Asthma

NZ Direct costs: \$102 million 1998/99 (Mitchell 1999)  
 \$17 million - Hospital (did not include outpatient or ED attendances)  
 \$85 million pharmaceutical

#### COPD

NZ Direct costs: \$103-\$192 million (2002)  
 Hospitalisations were the highest costs items - 63%  
 Pharmaceuticals account 15% of costs

#### Lung Cancer

NZ Direct costs \$18-\$28 million  
 Hospitalisations were 2/3 of costs  
 Palliative care costs more expensive than pharmaceuticals

#### Obstructive Sleep Apnoea

Direct cost \$29 million (Scott 2007)  
 Direct accounted for hospital, outpatient, GP visits, surgery, appliance, transport  
 Indirect \$10 million  
 Indirect mainly loss of productivity and 1/3 of direct costs  
 Intangible costs \$1.3 million (loss of life)

	 <b>Collaborative Pathways (CP) Update</b>
	For the attention of: <b>HB Clinical Council and Consumer Council</b>
Document Owner: Document Author(s):	Mark Peterson, Chief Medical Officer Primary Care Leigh White, Portfolio Manager, Strategic Services
Reviewed by:	Mary Wills, Head of Strategic Services Belinda Sleight, Project Manager, Health and Social Networks
Month:	November 2016
Consideration:	For Information

## RECOMMENDATION

### That Clinical Council and Consumer Council:

- **Note** that 30 pathways are completed and GPs are increasing their use.
- **Note** the team continues to socialise by visiting individual practices, CME training and quarterly newsletters

## EXECUTIVE SUMMARY

The primary purpose of the enclosed documents is to provide an outline of work to date.

## OVERVIEW

A recommendation from Clinical Council was to focus on three key work areas in 2016/17. Three key intentions (pathway development, marketing and embedding work) have been outlined in the following documents:

- |                                       |            |
|---------------------------------------|------------|
| 1. Overview of intentions             | pages 3-6  |
| 2. Monitoring Plan against intentions | pages 7-12 |
| • Supporting documentation:           |            |
| ○ Budget                              | page 13    |
| ○ Data Monitoring                     | page 14-5  |
| ○ CP Dashboard of Pathway progress    | pages 16-8 |
| ○ Example of newsletter               | page 19    |

**IN SUMMARY:**

The new cellulitis pathway is reducing medication prescribing and administration. Last days of life pathway is leading to improvements in consistency of practice in aged residential care.

There are clear expectations of what needs to be done however there are numerous roadblocks to be able to achieve the work programme. This is despite a small committed team. Visible clinical support is still required from Clinical Council.

The team is talking with Auckland, Canterbury and MidCentral DHB to link e referrals to pathways. This doesn't seem to have been achieved elsewhere to date.

## Work Plan for 2016/June 2017 – 3 Key Intentions

Activities	Task/Action	Resources
<b>1.</b> <b>COMMITT</b> Pathway development  <b>Outcome</b> To complete	<b>Task:</b> <b>Pathway Development:</b> (either requested as Expression of Interest (EOI) or aligned to Annual Plan). Note: New Pathways are approved by CCP Committee prior to work commencement. Note there may be 5 pathways within one.  <b>Action:</b> <b>Committed – in development (refer to dashboard)</b> <b>EOI - planned to commence/no date confirmed:</b> Toothache, Osteoarthritis Mobility Action, Falls with Fractures, Frailty, Gestational Diabetes, Midwifery Pathways, mental health Pathways. <b>Alignment to key National/DHB goals:</b> Faster Cancer Treatments – Colorectal, Breast, Prostrate, GI, Hep C. <b>As per Annual Plan:</b> <ul style="list-style-type: none"> <li>Development of Clinical Pathways for high prevalence conditions (e.g. depression, anxiety) collaboratively with NGOs, with opportunities for increased efficiency and collaborative working identified.</li> <li>Develop Clinical Pathways for better collaboration between primary and secondary care</li> <li>Fully implement and socialise the Diabetes Clinical Pathway across the sector by December 2016</li> <li>Standardise clinical practice and through the development of a Cellulitis Clinical Pathway by Q1 and the implementation and socialisation of the CHF Clinical Pathway by Q2</li> </ul>	<b>Responsibilities</b> CMO LTC Portfolio Manager  <b>Staffing</b> LTC Portfolio Manager CP Editors Co-Op – Clinical Leaders Health professional participation to develop Pathways  <b>Completion Date</b> Review June 2017  <b>Monitoring</b> Usage – back-end monitoring Feedback IT support to monitor change  <b>Resources</b> Existing budget

Activities	Task/Action	Resources
	<ul style="list-style-type: none"> <li>• Implement and socialise the Clinical Pathway 'Wheeze in Preschool Children' to primary care, Breathe HB and Central Health</li> <li>• Agreeing Clinical Pathways for palliative care</li> <li>• Localise Central Region Pathways for colorectal and lung cancer by Q1. Work with the Central Region to develop Clinical Pathways for bowel and breast cancer and localise by Q4</li> <li>• Complete and implement a Clinical Pathway for Primary Care Management of TIA</li> <li>• Complete design and Implementation of Map of Medicine Pathway for Colonoscopy and CT Colonoscopy. The Pathway will promote the use of National Referral Criteria for direct access outpatient colonoscopy and standardise the triage process for surgical and medical colonoscopy referrals</li> <li>• Review Clinical Pathway for Hip and Knee Pain to improve self-management and non-surgical intervention in the community and better alignment of primary and secondary care</li> <li>• Promote and implement the Hepatitis C Clinical Pathway</li> </ul>	
<p><b>2.</b> <b>MARKET.</b> Development and Socialisation</p> <p><b>Outcome</b> Usability</p>	<p><b>Task:</b> <b>Raise profile</b></p> <p><b>Actions:</b></p> <ul style="list-style-type: none"> <li>• Continue to build relationships with providers, GP Visits, Face to Face, Internet , Advertising , PHO Portal, CEO news</li> <li>• Remuneration for pathway participation for health professionals</li> <li>• Employ dedicated GP on a 4 hours (0.1 FTE) basis with specific duties. Work on Job description (include: compulsory attendance in 2 working group meetings to develop Pathway content, apply local region specifics and determine data measures for evaluation, 2-3 electronic reviews via email or teleconferences (mainly final phases), compulsory champion with their peers and wider local group, lead education session to launch the Pathway in the chosen education forum)</li> </ul>	<p><b>Responsibilities</b> LTC Portfolio (0.5 FTE of current role)</p> <p><b>Staffing</b> LTC Portfolio Manager CP Editors Co-Op – Clinical Leaders Health professional participation to develop Pathways Support from Strategic Services Interlink with MidCentral and Whanganui Existing staff Utilisation of the PHO Clinical Pharmacists/Facilitators</p>

Activities	Task/Action	Resources
	<ul style="list-style-type: none"> <li>CME/CNE sessions</li> <li>CME/CNE attainment recognised through MoM</li> <li>Work with adopters/champions</li> <li>Positive consumer stories (work with QIPS Team)</li> <li>Investigate opportunities to support Pathway with regards change of prices or new innovation e.g. paying for private echoes for small group of population</li> </ul>	PHO Medical Advisors
		<b>Completion Date</b> Ongoing reviews  <b>Monitoring</b> Usage – back-end monitoring Feedback
		<b>Resources</b> Remuneration – supported in existing budget Dedicated GP – ON HOLD as per CMO decision
<b>3</b> <b>EMBED.</b> Usability and availability  <b>Outcome</b> Right IT Platforms to support practice	<b>Task:</b> <b>Socialise and integrate Clinical Pathways for use in primary care and other key providers (e.g. Aged Residential Care).</b>  <b>Actions:</b> <ul style="list-style-type: none"> <li>Understand the Inter-relationship with Map of Medicine/Med-Tech/My Practice (IT Platforms/Vendors Business rules).</li> <li>Keep abreast with funding (£.00) can be subject to exchange rate fluctuations.</li> <li>Investigate the current tool. Is it responsive and easily used as this will encourage use that will therefore support best practice; workflows will be improved meaning less duplication and lost opportunities for gaining better outcomes for the person.</li> <li>It is recognised that there is some work to be done in order to gain integration between e-referrals (Healthlink forms) and the practice</li> </ul>	<b>Responsibilities</b> LTC Portfolio (0.5 FTE of current role) CMOs Head of Strategic Services
		<b>Staffing</b> LTC Portfolio Manager Support from IT Department
		<b>Completion Date</b> Recommendation by end of June 2017  <b>Monitoring</b> Feedback

Activities	Task/Action	Resources
	<p>management system (Medtech, My Practice) in general practice. This challenge exists with other Pathway applications being used in New Zealand; however we are currently negotiating MoM's involvement in finding solutions and looking at other Vendor opportunities</p> <ul style="list-style-type: none"> <li>• Develop new QA process - Achieving benefits requires a clear understanding of what we are trying to achieve by developing Pathways, and a means of measuring this.</li> </ul>	<p></p> <p><b>Resources</b> No budget</p>

Collaborative pathways - **Monitoring Plan for 2016/June 2017**– key:  1: Planning, 2: Implementing, 3: On track, 4: On track with significant issues

Activities	Narrative
	<p><b>Secondary care</b></p> <ul style="list-style-type: none"> <li>• communication is out there but support is not a high priority against other competing workloads – discussion takes place about ‘push back’ – if referral does not meet criteria however there has been limited uptake from secondary care to look and/or change E-referral. Unsure what needs to happen?</li> <li>• updates via Staff News – well received with feedback at times</li> <li>• Involving ED – Met with Consultants with regards to Secondary Care Cellulitis Pathways – trial - when published</li> <li>• Easy access through Nettie</li> </ul> <p><b>Other Providers</b></p> <ul style="list-style-type: none"> <li>• Connecting with many other providers – Pharmacies, District Nurses, Cranford, Home care Services - ongoing</li> </ul> <p><b>External to HB</b></p> <ul style="list-style-type: none"> <li>• Established fortnightly teleconferences with Whanganui/MidCentral – with regards FCT relationship</li> <li>• Governance Meetings – quarterly</li> <li>• Established monthly meetings with Map of Medicine Senior Programme Consultant</li> </ul> <p>Challenges to get GPs to develop pathways</p> <ul style="list-style-type: none"> <li>• GPs not available despite funding for their time. Competing against direct patient time. This is not unique to HB.</li> </ul> <p><b>Example of Consumer story:</b></p> <div data-bbox="725 948 1962 1139" style="border: 2px solid orange; border-radius: 10px; padding: 10px; margin: 10px 0;"> <p style="text-align: center;"><b>Consumer feedback – Thyroid Pathway</b></p> <p>This Pathway has been interesting and timely. I am a locum Pharmacist with hypothyroidism (diagnosed 18 months ago).</p> <p>I found the Pathway useful and despite knowing much of the information it filled in a few gaps. I will continue to read the saved Pathways and information/links.</p> </div>

Activities	Task/Action
<p><b>3. EMBED</b></p> <p><b>Task:</b> IT process</p> <p>1 + 2 + 3 = 4</p>	<p><b>IT Inter-relationship and functionality</b></p> <ul style="list-style-type: none"> <li>Single sign on through MedTech system has been accomplished in Practices with Medtech/other practices can access MoM through desktop applications</li> <li>Marketing issues still remain – trying to sell capacity and benefits with tools not supporting processes is very difficult.</li> </ul> <p><b>What is our current gap</b></p> <p>Simply defining and publishing a static Pathway does not typically lead to the reduction in variation of care and the improvements anticipated. This is generally related to the habits and practices of the clinical care providers and the systems they have available.</p> <p><b>In the ideal world</b></p> <p><i>To make a GP's job easier:</i> What they want is to go through a pathway and the outcome maybe to create a referral letter, maybe radiology and laboratory requests and/or maybe an administrative tool (links in with advanced forms payments) that link – not going in/out of different IT platforms – if the system is easy to use then it will benefit the person as there will be more time to spend with them</p> <div data-bbox="678 826 1223 1302"> </div>

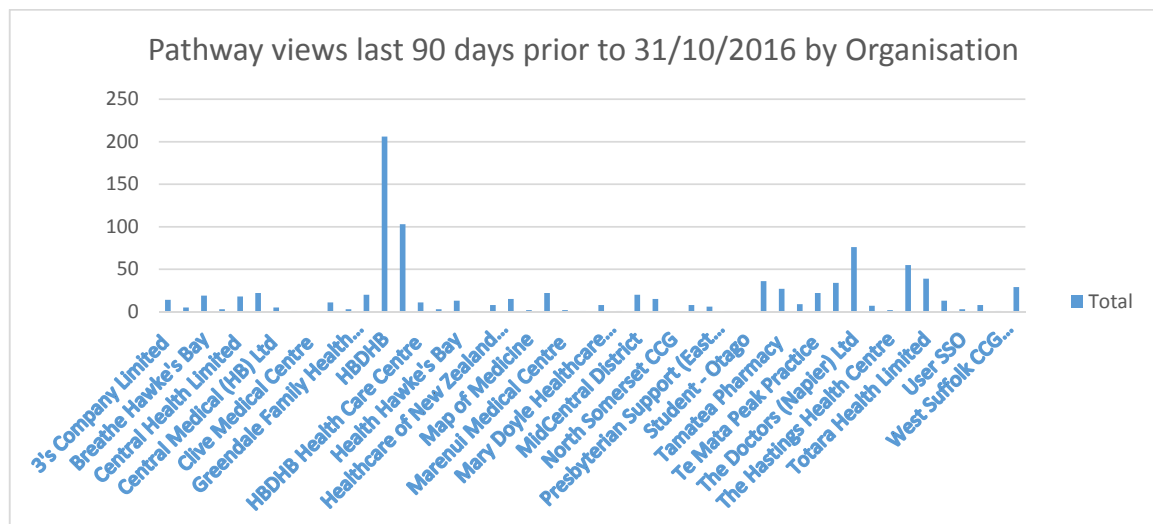

Activities	Task/Action
	<p><b>Work to date</b></p> <p>We have been exploring other Vendor capabilities as our experience in understanding the current IT systems demonstrates that they are not provider centric, not integrated, and do not coordinate a patient-centric journey that encourages;</p> <ul style="list-style-type: none"> <li>• the sharing of information</li> <li>• the delivery of consistent best practice care and</li> <li>• the measurement of outcomes</li> </ul> <p>What we are asking is: <b>a full person's journey (person-centred) mapped, and where the user has the ability to access differing processes within one central (application) point.</b></p> <p><b>More work is required before presenting to EMT and Clinical Council – but below is a snapshot to date of Vendors</b></p> <ol style="list-style-type: none"> <li><b>1. Map of Medicine</b> <ul style="list-style-type: none"> <li>○ robust tool but static</li> <li>○ formats – flowchart</li> <li>○ rigid QA processes e.g. links to NICE Guidelines</li> <li>○ does not interface with referral systems and/or administrative process</li> <li>○ does not link to the person patient management system</li> </ul> </li> <li><b>2. Health pathways (3D)</b> <ul style="list-style-type: none"> <li>○ static tool that needs localising</li> <li>○ content appears to be mostly derived from practice-based knowledge, although senior clinicians provide an over-viewing function and content reflects New Zealand guidelines</li> <li>○ formats – narrative</li> <li>○ does not link to the person event</li> <li>○ secondary users perceive can be overly focused on primary care, perceiving that an appreciation of the whole patient journey was lost and leaving little functionality for hospital-based staff</li> </ul> </li> <li><b>3. Pathway Navigator Limited - Next</b> <ul style="list-style-type: none"> <li>○ new developers</li> <li>○ pathways are dynamic and linked to the person (they deliver transformed versions of existing static pathways)</li> <li>○ travels the person journey – can link to the person event (PMS)</li> </ul> </li> </ol> <p><b>MORE WORK TO DO.....</b></p>

## Data

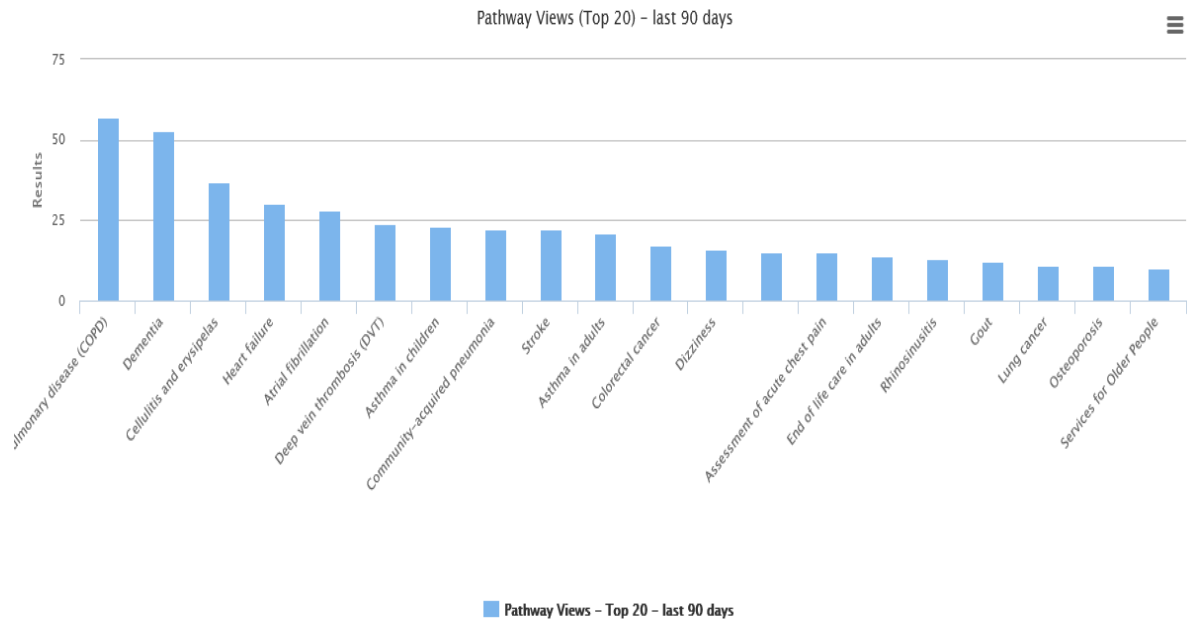

**Graph1:** General Practice are the higher users of MoM – this is predictable – work to be done marketing in Hospital Services

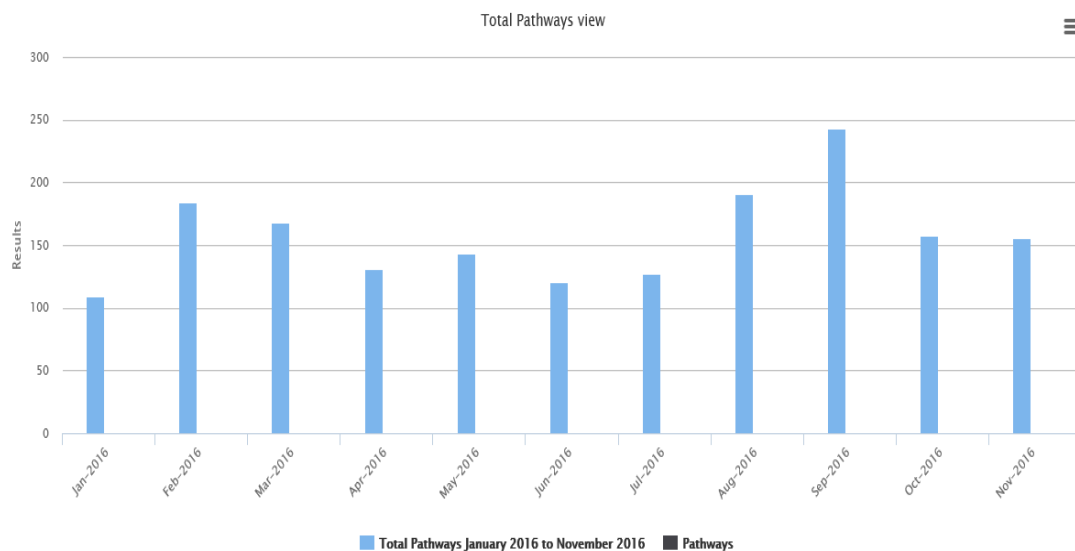

**Graph 2:** Please note: External users are also able to access our local Maps - once published are on the international scene!

**Graph 3:** This data reflects practice delivery – COPD access is encouraged by CNS working in this field to all workforces and the good work of the Dr E. Plesner who will refer back referrals that are in complete and denotes in the letter back to refer to dementia pathway

**Graph 4:** Pleasing to see the increase in usage over August/ September months as this is when the CP team commenced socialisation (visits to GP practices) to market the product.

## Hawke's Bay Collaborative Pathways Update November 2016

### Published November

- **Gout** – review
  - Thanks to Dr Gardner and Dr Rogers for review of this pathway – no changes
- **Rehydration**
  - Thanks to Dr A. Wright

#### Education - Colorectal pathways

Thanks to Tom Boswell for taking the time out to connect with Hastings Health Centre GPs and for Dr Louise Haywood for organising.

#### *We had feedback*

Map of Medicine is too “clunky” so don’t use We like E-referrals but let’s get them right to meet our local requirements and align to the Maps

#### *Answers*

Conversations are what count – having both parties in the room so open dialogue can occur is a great bonus.

We are reviewing the E-referrals – with our IT Department

### Nearing readiness for Publication: December/January

- **Hep C** (this has been a national development to localise and we have delayed this pathway due to a number of reasons – getting it right for us in HB!)
- **Eczema in Children** – a dynamic group led by Dr A. Craig (Paediatrician) and GP Dr D. Wales – collaboratively having the discussions on the skin care that is required!
- **Breast** – this is being led by our external facilitator based in Mid-central
- **Cortisone** (demand is exceeding provision of service – yes there will be some changes – we have Dr Peterson and Dr Rogers working with our Andrew West to pave a new direction – watch the space!)

#### Circulating pathways for consultation to wider networks is the way to go

We recently circulated the Hepatitis C Pathway and now have put a stop until we include our public Health Unit referral processes – this shows to our small team that circulating pathways for consultation to wider networks is a must – whole sector approach is what we want – Thanks to the Public health Unit

### Published Pathways (update June 2016)

- Atrial Fibrillation
- Assessment of Acute Chest Pain
- Asthma in Adults (Acute/Chronic)
- Asthma in Children (Wheeze in Preschool, Acute (1-15 yrs.), Chronic 5-15 yrs.)
- Cellulitis (Primary Care)
- Community Acquired Pneumonia
- Colorectal (Suspected, Iron Deficiency Anaemia, Altered bowel Habits, Rectal Bleeding & Surveillance)
- COPD (Suspected, Stable, Management of Acute)
- Dementia (Assessment ,Uncomplicated)
- Diabetes – (Type 1,2, Foot Ulcer)
- DVT (Lower Limb)
- Gout
- Heart Failure (Suspected, Management in Primary Care)

#### Quick questions – I have been told

It can take up to 6 years for changes to be truly embedded – Is this right???  
I am hoping not??

### Published Pathways (update June 2016)

- Lung Cancer (Suspected)
- Obstructive Sleep Disorder (Suspected)
- Osteoporosis
- Last Days of Life
- Lung cancer (Suspected)
- Melanoma (Suspected)
- Osteoarthritic Hip
- Osteoart Knee
- Osteoporosis and Fracture Prevention
- PVD
- Rhinosinusitis
- Services for Older people
- Skin Lesions
- Smoking Cessation ABCD
- Stroke and Transient Ischaemic Attack (Primary Care)
- Abnormal Thyroid
- Vertigo Assessment and Management

#### RECOMMENDATION

##### MRB, Clinical and Consumer Council:

Note the contents of this report.

#### OVERVIEW

The purpose of this paper is to provide MRB, HB Clinical Council, HB Consumer Council and the HBDHB Board with exception report for Quarter 1 on the implementation of the 2016 – 2017 Annual Māori Health Plan. A quick reference summary dashboard will be supplied prior to the meeting and shows our position as at the end of Quarter 1 for all indicators. The dashboard uses traffic light methodology with detailed information and symbols for all indicators. For example, in a situation where the performance of the indicator for the current quarter is higher than the previous quarter this symbol '▲' will be used to show an upward trend while an opposite symbol '▼' will be used to show a downward trend. In cases where the variance to the annual target for the indicator is greater than 0.5% this symbol 'U' (*indicated on the dashboard in red*) will be used to indicate unfavourable trend and 'F' for favourable trend (*indicated on the dashboard in green colour*) toward the annual target (see the table below).

#### KEY FOR DETAILED REPORT AND DASHBOARD

<b>Baseline</b>	Latest available data for planning purpose
<b>Target 2015/16</b>	Target 2016/17
<b>Actual to date</b>	Actual to date
<b>F (Favourable)</b>	Actual to date is favourable to target
<b>U (Unfavourable)</b>	Actual to date is unfavourable to target
<b>Trend direction ▲</b>	Performance is improving against the previous reporting period or baseline
<b>Trend direction ▼</b>	Performance is declining
<b>Trend direction -</b>	Performance is unchanged

## 2017-2017 ANNUAL MĀORI HEALTH PLAN PERFORMANCE HIGHLIGHTS

### Achievements

#### 1. Cervical screening

Cervical Screening for 25-69 year old Māori women (72.7%) for this quarter is slightly lower than the 73.2% in the last 2015-2016 quarter (Page 5). However, HBDHB continues to be on the top list on Cervical Screening performance in New Zealand. This performance also narrows the disparity gap between Māori and non- Māori by 5.5%.

The performance is attributed to the HBDHB integrated service approach across the screening pathways in working together towards a common goal of attaining the national target for Māori women and addressing inequity. Māori women have access to free cervical smear tests and support services across the district. We have been working closely with GP practices to improve participation of NCSP priority group women in screening e.g. Best Practice in Primary Care project and data-matching. In addition, we have been contacting Māori and Pacific women who have never had a cervical smear or have not had one for over five years by phone or home visits, and offering outreach smears. The uptake has been positive.

Recent population projections released by the National Screening Unit show that in the next five years (2016-2021) Hawke's Bay's NCSP eligible Māori and Pacific populations will increase by 7% and the Asian population will increase by 16%. This is a challenge our sector need to prepare for.

#### 2. Immunisation

HBDHB ranks 3<sup>rd</sup> nationally for immunisation rates for 8 months old Māori and has remained above or very near the target of ≥ 95% with a 94.4% in Quarter 1 (Page 6).

This success is attributable to a number of factors ranging from having a champion in the executive management team; a committed, appropriate, experienced workforce; and an action plan with sound tracking and tracing processes with NIR to ensure that children are referred to outreach if needed in sufficient time to locate them. Attempts are made to contact all families with overdue children to offer immunisation and information / resources if hesitant.

Efforts will be focused on fostering collaborative relationships with all immunisation providers to promote immunisation within the community at antenatal sessions monthly and PEPE groups (first time parents) run through Plunket.

### Areas of progress

#### 1. Mental Health and Addictions

Māori under Mental Health Act compulsory treatment orders has decreased from 201.6 per 100,000 population in Quarter 4 of 2015/16 to 183.9 per 100,000 population in Q1 2016/17. There still remains a significant inequality between Māori and non-Māori of 94.2 per 100,000 population down from 104.9 per 100,000 population in Quarter 4 (Page 7).

#### 2. Access to Care

The number of Māori enrolled in the Health Hawke's Bay PHO increased slightly by 1% from 95.6% in Quarter 4 of 2015-2016 to 96.6% in Quarter 1 in 2016-2017 and remains slightly below the expected performance target of 97% (Page 8). Currently HBDHB ranks 4<sup>th</sup> among all DHBs in the country for Māori PHO enrolments.

#### 3. Rheumatic Fever

Acute Hospitalisation for Rheumatic Fever has decreased from 7.33 in Quarter 3 of 2015-2016 to 4.82 in Quarter 1 of 2016-2017 (6 monthly data) (Page 9).

#### **4. Alcohol and Other Drugs**

Access to services for 0-19 Year Olds within 3 weeks of referral increased by 4.2% from 66.4% in Quarter 4 of 2015-2016 to 70.6% in Quarter 1 of 2016-2017 but still below the expected target of 80%. Similarly, 0-19 Year Olds seen within 8 weeks of referral increased slightly from 91.4% to 91.7% but less than the target of 95% (Page 10).

The decreased wait times has been a focus over 2016 and is a product of collaborative work with referrer (e.g., schools, CYF) in ensuring that we provide most seamless service possible for Māori.

#### **Areas of focus**

The above achievements notwithstanding, we are challenged to put more efforts in the following areas to gain traction towards targets:

##### **1. Ambulatory Sensitive Hospitalisations**

ASH Rates in 2015/16 and presented a significant narrowing of disparity gap for 0-4 year old group between Māori and Other and HBDHB has 3<sup>rd</sup> best results for all DHBs for 0-4 year old group. However in Quarter 1 of 2016/17 they have risen 13.1% to from 78.6% in Quarter 4 to 91.7% in Quarter 1. Similarly, ASH Rates for 45-64 year old group have increased from 170% in Quarter 4 to 196.0% in Quarter 1 presenting a significant inequality between Māori and non- Māori of 87% (Page 11).

##### **2. Breast Screening**

Breast screening services for (50-69yrs) has decreased slightly from 67.9% in Quarter 4 of 2015-2016 to 67.1% in Quarter 1 of 2016-2017 and remains just below the expected target of ≥70% (Page 12).

##### **3. Workforce Development**

Staff completed cultural training is making slow progress from 77.5% in Quarter 4 to 78.8% in Q1. Medical staff (39.9%) and Support staff (63.3%) have progressed the slowest of all occupational groupings. Medical staff, despite a 25.6% increase in 2015/16, have only increased 0.3% from Quarter 4 to 39.9% in Quarter 1 (Page 13).

Māori Workforce did not grow in Quarter 1 and remained static at 12.5%; the same result noted in Quarter 4 of 2015-2016 (Page 14). Whilst the 2016-2017 annual target of 13.8% is only an additional 10% on 2015-2016 result, it remains a significant challenge.

##### **4. Obesity**

The B4SC data for Quarter 1 of 2016-2017 (6 monthly data) shows that only 18% of Māori Children with BMI in 98<sup>th</sup> percentile were referred to a health professional for nutritional advice, which is a 2% decrease from 20% reported in Quarter 3 of 2015-2016 (Page 15).

## ANNUAL MĀORI HEALTH PLAN, QUARTER 1 JULY – SEPTEMBER 2016 DASHBOARD REPORT

## QUARTERLY PERFORMANCE AND PROGRESS UPDATE

13 years to December 2015

23 years to June 2015

33 years to August 2016

<sup>4</sup> October to December 2015

<sup>5</sup> April to June 2016

<sup>6</sup> July to September 2016

## Mental Health

**Outcome: Reduced rate of Māori under compulsory treatment orders to < 81.5 per 100,000 (total population)**

Key Performance Measures	Baseline <sup>7</sup>	Previous result <sup>8</sup>	Actual to Date <sup>9</sup>	Target 15-16	Trend direction	
Māori (per 100,000)	196	201.6 (U)	183.9 (U)	≤81.5	▲	<p>Section 29 Orders per 100,000 Population</p>
Other (per 100,000)	93.4	64.5 (F)	60.1 (F)	≤81.5	▲	
Total (per 100,000)	97	97.3 (U)	89.7 (U)	≤81.5	▲	
<p>Comments:</p> <p>Some recent trending down for Māori CTO rates is positive but more work needed to reduce in longer term. Activity in the table below indicate moves to better understand complexities of this issue and greater connection with our communities and whānau, which is imperative. Community Mental Health vision is to have a greater Whānau Ora type approach to our treatment and service provision with a more holistic approach to needs, including social and economic factors, to support whānau aspirations for improved wellness and lifestyle. Supporting Parents Healthy Children (was COPMIA) and Pregnancy Parenting Support initiatives are examples of how and where we will be resourcing this work.</p> <p>A Te Ara Whakawaiaora paper was presented and discussed at MRB in August. Subsequently, the Mental Health directorate and Māori Health Services have organised a wananga that will be held in Q2 with a wide group of stakeholders to discuss the complexities of compulsory treatment orders.</p>
